premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends **Bossa Mundo** K. E. Goldschmitt, 2020 Brazilian music has been central to Brazil's national brand in the U.S. and U.K. since the early 1960s. From bossa nova in 1960s jazz and film through the 1970s fusion and funk scenes the world music boom of the late 1980s and the bossa nova remix revival at the turn of the millennium and on to Brazilian musical distribution and branding in the streaming music era *Bossa Mundo: Brazilian Music in Transnational Media Industries* focuses on watershed moments of musical breakthrough exploring what the music may have represented in a particular historical moment alongside its deeper cultural impact. Through a discussion of the political meaning of mass mediated music author K. E. Goldschmitt argues for a shift in scholarly focus from viewing music as simply a representation of Otherness to taking into account the broader media environment where listeners and intermediaries often have conflicting priorities. Goldschmitt demonstrates that the mediation of Brazilian music in an increasingly crowded transnational marketplace has lasting consequences for the creative output celebrated by Brazil. Like other culturally rich countries in Latin America such as Cuba Mexico and Argentina Brazil has captured the imagination of people in many parts of the world through its music driving tourism and international financial investment while increasing the country's prominence on the world stage. Nevertheless stereotypes of Brazilian music persist especially those that valorize racial difference. Featuring interviews with key figures in the transnational circulation of Brazilian music and in depth discussions of well known Brazilian musicians alongside artists who redefine what it means to be a Brazilian musician in the twenty first century *Bossa Mundo* shows the pernicious effects of branding racial diversity on musicians and audiences alike

Networked Music Cultures Raphaël Nowak, Andrew Whelan, 2016-09-16 This collection presents a range of essays on contemporary music distribution and consumption patterns and practices. The contributors to the collection use a variety of theoretical and methodological approaches discussing the consequences and effects of the digital distribution of music as it is manifested in specific cultural contexts. The widespread circulation of music in digital form has far reaching consequences not least for how we understand the practices of sourcing and consuming music the political economy of the music industries and the relationships between format and aesthetics. Through close empirical engagement with a variety of contexts and analytical frames the contributors to this collection demonstrate that the changes associated with networked music are always situationally specific sometimes contentious and often unexpected in their implications. With chapters covering topics such as the business models of streaming audio policy and professional discourses around the changing digital music market the creative affordances of format and circulation and local practices of accessing and engaging with music in a range of distinct cultural contexts the book presents an overview of the themes topics and approaches found in current social and cultural research on the relations between music and digital technology
