taxed as earned income if held less than 12 months. However, portfolio income is not taxed for Medicare or Social Security. Capital gains can be offset by losses on other investments, which is a huge plus. Characteristics: One downside is that for the average person, investing can seem intimidating. This often keeps people away from doing it. It wasn't until I became a Certified Financial Planner that I really understood what was going on with respect to portfolio income. If you're just getting started with investing, read this post 21 tips for investing in your 30s. Also, this type of income can take a long time to generate if you believe in many of the widely held investing concepts that require buying and holding for years. If you're a trader and attempt to do it much faster, you better be really good at it because otherwise, it's sort of like gambling. You have to have money to invest upfront to create portfolio income. This is a huge reason why people say they don't invest. You can start with a small amount and contribute to your investments over time, but it requires you to have the capital to do it. If you want to get started with hiring someone to help you with your money, read this post on questions you should ask your financial advisor before hiring her. I like using investing as a supplemental income strategy. I don't want to retire, but I like the idea that I could if I ever change my mind or it became medically necessary. So I save and invest as a bit of a safety net, but not as the end goal of retiring as soon as possible. I like contributing to the world through my work and I also like creating a lot of income. I just don't ever tie my hard work or time to income generated. This way, I know my income potential is unlimited.

### 3. PASSIVE INCOME

**Definition:** Passive income is money generated from assets you own where you are not actively working.

**Examples:** Rental income, business income, as long as it's not earned based on time and effort creating, selling, intellectual property, e.g. books.

**Tax implications:** Passive income receives the most favorable tax treatment.

**Characteristics:** Passive income is thought to be the key to building wealth. Once you have an investment that generates recurring income, you don't have to do much to maintain it, so time is not a limitation. Typically, there isn't much start-up cost to passive income that you have to provide yourself. For example, you can use your time to create a business or you can get funding from investors for your real estate properties or start up company. It's not as easy as earned income, but it's not as challenging as portfolio income in terms of start-up funds. It takes a lot of money to make a lot of portfolio income, whereas you can generate a lot of passive income with less. I started a blog with the idea of generating passive income, the Smart Passive Income podcast used to be on repeat. It's one of the best things I ever did.

**A FINAL NOTE:** Understanding how income works is important because it affects how you go about deciding what results you want with money in your future. Do you want to retire? Do you want financial independence early? Do you want to focus on contributing to the world through your work as an entrepreneur? Do you want money just to be a scorecard of the value you provide? Do you believe that hard work and time create money? So many questions. These are philosophical questions, but whatever you believe will drive your feelings, which will drive your actions, which will drive your results. So ultimately, your beliefs drive your results. You can read more about this in the 5 step framework to master your mindset post here. Based on what you choose to believe, you could end up financial independent.

and retiring very young and living off 4% of your investment portfolio with frugal values while traveling and doing whatever else you want to experience the world while you're alive. Or you could end up a multimillionaire focusing on serving the world through your work and never retiring. Completely different results. Both involve a lot of money. What you choose matters. What you believe about money matters. What you do matters. The three different types of income are a way of learning how to use money to your advantage to get the results you want most. This is the way our system works. The sooner you understand how money works the sooner you can make better decisions that will help you achieve financial success whatever that looks like to you.
