Cyber Campus : Uniting and expanding the cybersecurity ecosystem Michel Van Den Berghe, Yann Bonnet, Charly Berthet, Christian Daviot, Jean-Baptiste Demaison, Faustine Saunier, On 16 July at the instigation of the President of the Republic the Prime Minister entrusted Michel Van Den Berghe with the task of studying the feasibility of a cyber campus with all the players in the digital ecosystem His aim to define a new center of gravity for digital security and trust in France and Europe The prefiguration report for the Cyber Campus was presented at the 2020 International Cybersecurity Forum in Lille by C dric O Secretary of State for Digital Affairs and Michel Van Den Berghe This document defines the major missions as well as the vision for this unifying project It also presents the keys to its success directly from the opportunity study that is also proposed Generating Entrepreneurial Ideas With AI Özsungur, Fahri, 2024-07-18 Technology and entrepreneurship converge in the digital era presenting many possibilities and hurdles One of the most pressing issues facing entrepreneurs is the ability to harness the power of artificial intelligence AI to drive innovation and create sustainable businesses While AI holds immense potential for transforming entrepreneurial ideas across various fields many individuals and organizations need help understanding its practical applications and implications *Generating Entrepreneurial Ideas With AI* offers a comprehensive solution to this challenge By examining the intersection of AI and entrepreneurship from a multidisciplinary perspective we provide readers with invaluable insights and strategies for leveraging AI to enhance their entrepreneurial endeavors This book is designed for students entrepreneurs policymakers and academics It is a practical guide and roadmap for integrating AI into entrepreneurial practices Through a series of in depth analyses and case studies we demonstrate how AI can effectively identify new business opportunities optimize operations and enhance the overall competitiveness of ventures **Advances in Data Science, Cyber Security and IT Applications** Auhood Alfaries, Hanan Mengash, Ansar Yasar, Elhadi Shakshuki, 2019-12-20 This book constitutes the refereed proceedings of the First International Conference on Intelligent Cloud Computing ICC 2019 held in Riyadh Saudi Arabia in December 2019 The two volume set presents 53 full papers which were carefully reviewed and selected from 174 submissions The papers are organized in topical sections on Cyber Security Data Science Information Technology and Applications Network and IoT *Cybersecurity Culture* Gulsebnem Bishop, 2025-04-29 The culture of cybersecurity is a complex subject We can look at cybersecurity culture from different perspectives We can look at it from the organizational point of view or from within the culture Each organization has a culture Attitudes toward security have different manifestations in each organizational culture We also see how the cybersecurity phenomenon unfolds in other cultures is complicated Each culture reacts differently to this phenomenon This book will emphasize both aspects of cybersecurity From the organizational point of view this book will emphasize the importance of the culture of cybersecurity in organizations what it is and how it can be achieved This includes the human aspects of security approach and awareness and how we can design systems that promote the culture of security It is also

important to emphasize the psychological aspects briefly because it is a big part of the human approach. From a cultural point of view, this book will emphasize how different cultures approach the culture of cybersecurity. The cultural complexity of cybersecurity will be noted by giving examples from different cultures. How leadership in different cultures approach security and how different cultures approach change. Case studies from each culture will be presented to demonstrate different approaches to implementing security and training practices. Overall, the textbook will be a good resource for cybersecurity students who want to understand how cultures and organizations within those cultures approach security. It will also provide a good resource for instructors who would like to develop courses on cybersecurity culture. Finally, this book will be an introductory resource for anyone interested in cybersecurity's organizational or cultural aspects. **Diversity, AI, and Sustainability for Financial Growth**

Margaretha van der Poll, Huibrecht, Andrew van der Poll, John, Ngwakwe, Collins Chigaemecha, 2025-01-31. In today's business landscape, the intersection of diversity, artificial intelligence (AI), and sustainability is reshaping the path to financial growth. Companies that embrace diversity in their workforce and leadership realize the competitive advantage of various perspectives which drive innovation and foster better decision making. When combined with the potential of AI, these organizations streamline operations, enhance customer experiences, and make informed data-driven decisions. A commitment to sustainability aligns with global trends toward environmental responsibility while opening up new markets and investment opportunities. Further exploration of the combination of diversity, AI, and sustainability will enable businesses to thrive in today's technology-driven economy. **Diversity, AI, and Sustainability for Financial Growth** provides solutions for business to remain resilient and value-driven amidst contemporary developments that challenge business stability. It explores the growing changes and turbulence in the current economic and business landscape and examines solutions for environmental sustainability, technological expansion, and diversity. This book covers topics such as cybersecurity, information technology, and sustainable development and is a useful resource for business owners, economists, computer engineers, data scientists, security professionals, academicians, and researchers.
