## **Sports Training Complete Workbook:**

*The Complete Guide to Sports Training* John Shepherd, 2013-05-31 The Complete Guide to Sports Training is the definitive practical resource for anyone wishing to improve their performance and for coaches looking to get the best out of their athletes. It demystifies sports science and provides athletes and coaches with the basic building blocks they need to maximise performance. Starting with the basics and progressing to the specific elements all athletes need: speed, endurance and power. This invaluable handbook explains the theory in simple, easy-to-understand terms before discussing the most effective training methods and techniques, as well as giving guidance on developing a training plan, sports psychology and training younger and older athletes. This is the first time such a wealth of sports science knowledge has been available in one book and written in such an accessible style and should become the sports training handbook for athletes, coaches and sports science students.

**Sports Training** Dr. A. K. Uppal, 2020-09-03 To develop the physical education culture, it is essential the concept of sports training should be familiar to physical education teachers and coaches. Knowing the principles of sports training alone is not enough; teachers and coaches should be well-versed with the methods and means of sports training so that this knowledge can be successfully applied on the field. The personality and professional knowledge of the coach, teacher, trainer or instructor play a crucial part in the quality of sports training implemented. Therefore, to meet this principle, the coach must be able to integrate pieces of knowledge across the fields like anatomy, physiology, biomechanics, psychology, sociology, theory of motor learning and didactics. The subject of sports training is highly dynamic in nature. As a result of constant research, new knowledge is being evolved which in turn can be effectively utilized to enable sports persons to enhance their performance capacity and readiness of performance. I hope the book *Sports Training* which is based on my earlier books *Science of Sports Training* and *Principles of Sports Training* would provide latest scientific knowledge to the physical education students and teachers. The book is written for the students of physical education courses which are based on the prescribed syllabus of NCTE. The purpose of the book is to provide relevant text for the students and to lay the framework for a discussion of the relative significance of sports training. The presentation of the book is simple and language is very fluent and easy to understand. I am sure that the content of the book will not only be useful for the students of physical education but also for researchers, teachers and for those who are really interested to know about it.

**Complete Book on Correctives, Therapeutic Exercises, Sports Injuries and Massage** Dr. V.D. Bindal, 2021-05-17 With increasing growth faults and postural defects among children, application of corrective physical education becomes more significant as the regular type of physical education programme and activities will not meet out safely the physical and psychological needs of weak and underdeveloped children as the normal boys and girls will do. The book *Complete Book on Correctives, Therapeutic Exercise, Sports Injuries and Massage* is divided into 5 sections and 19 chapters containing various aspects of corrective physical education: postural defects, therapeutic exercise, rehabilitation, prevention and treatment of

sports injuries common therapeutic modalities and various aspects of massage and the description of massage techniques Written in a simple and easy language with plenty of illustrations the book is mainly intended for use as a text book and also as a reference book for the teachers and undergraduate and postgraduate students of physical education and sports B P Ed M P Ed for most of the Indian Universities However the students and professionals of coaching Fitness management physiotherapy and other allied health professions having interest and concern with the subject material may also find it useful to them

**Scientific Principles of Sports Training** Dr. A.K. Uppal, 2021-05-17 All activities which are part of human behaviour were subject to a long term development The result of the activity in both examples can be considered a performance Performance is understood as an extent to which motor task is accomplished In the case of the athlete performance is evaluated following rules of the sports discipline which were set in advance it is expressed by the length of

the throw and is understood as a sports performance An ability to achieve a given performance repeatedly is referred to as efficiency Sport training is understood as a process of systematic development of each component in dependence on the duration of preparation which leads to achieving maximum efficiency in senior age within the selected sports discipline Sports training focus on cultivating the athlete s personality further it focuses on systematic development of motor abilities and the process of acquiring motor skills within the specific sports discipline It is implemented at different performance and age levels Features of sports training can be found in various forms The aim of sports training is to achieve maximum individual or team efficiency in a selected sports discipline limited by rules To develop the physical education culture it is essential the concept of sports training should be familiar to physical education teachers and coaches Knowing the principles of sports training alone is not enough teachers and coaches should be well versed with the methods and means of sports training so that this knowledge can be successfully applied on the field The personality and professional knowledge of the coach teacher trainer or instructor play a crucial part in the quality of sports training implemented Therefore to meet this principle the coach must be able to integrate pieces of knowledge across the fields like anatomy physiology biomechanics psychology sociology theory of motor learning and didactics The subject of sports training is highly dynamic in nature As a result of constant research new knowledge is being evolved which in turn can be effectively utilized to enable sports persons to enhance their performance capacity and readiness of performance During the recent years some literature in this area has been produces but much of the literature reflects communistic philosophy Therefore there is a dire need to bring out a book on this topic to meet the demand of the students of physical education courses
