Appler,2016-09-22 Essay from the year 2015 in the subject Interpreting Translating grade 2 0 University of Heidelberg IUED
course bersetzungswissenschaft language English abstract At the IUED at Heidelberg University many different students
from all over the world gather to learn and improve their translation abilities This is probably one of the places with the most
students who grew up bilingual studying together However there are not only students who grew up bilingual but also
students who grew up monolingual After studying for some time most of the students ask the question Who is the better
translator There are several assumptions about growing up bilingual positive ones as well as negative ones Every single one
can be found on the internet posted by people worrying about their own children or other children and it can also be found in
various books about the matter One of those assumptions is also Children who grow up bilingual will make great translators
when they grow up so it is a legitimate question to ask who is better students who grew up bilingual or students who grew up
monolingual and learned a second language later in life To investigate this matter many questions have to be analyzed The
main question is about the issue of growing up mono or bilingual and becoming a translator In order to analyze this question
it is best to divide the analysis into several sub points The first point addresses the following areas the definition of mono and
bilingual the brain activity and development of children who grew up monolingual compared to children who grew up
bilingual the pedagogical question of how children learn how adults learn and do children really learn languages better and
faster than adults and if no how can adults have the same learning success as children The second regards the translator
What does it mean to be a translator and what abilities are important to be one Is it enough to know languages just as a
