Digital Inequality Anna Gladkova, Elena Vartanova, Shi-xu, 2024-12-16. Tracing the development of new technological skills and digital cultures, this book looks at the rise of new digital divides and reveals how these inequalities affect cross-cultural communication from a cultural discourse studies perspective in various ethnic and cultural groups across the world. The authors discuss the development of multicultural societies across the globe under new challenges brought by digitalization such as digital exclusion, new professional and personal demands in terms of digital engagement. In addition to highlighting digital inequalities in access, use and benefits of using ICTs, case studies from different national contexts demonstrate the ways minority ethnic and cultural groups are adapting to the new digital environment, explore the transformations that multicultural affairs and communication undergo in the new digital setting and analyse policy measures aimed at fostering digital inclusion of minor groups. The book advances knowledge of the digital divide, showing its development from a technological access and skill based problem into a social and culture oriented one. This resourceful text will be of interest to students and scholars of social inequality, digital media and communication studies and anyone interested in learning how multicultural discourses are developing in varied national contexts today.
