It details epidemiology, physiology, pathology, prevention, and management of cardiovascular diseases based on the current scientific understanding of Yoga. Seventy-five experts from four continents, including the most notable names, contributed to this work to create the world's first comprehensive reference literature on Yoga in cardiovascular medicine. The chapters cover information related to Yoga both as prevention and therapy, including coronary artery disease, heart failure, and arrhythmias. In addition, important cardiovascular topics like obesity and diabetes mellitus are also included.
