Materialism And The Mind Body Problem 2nd Ed

Elliot Murphy

Materialism And The Mind Body Problem 2nd Ed:

Representation and the Mind-Body Problem in Spinoza Michael Della Rocca, 1996-11-21 This first extensive study of Spinoza's philosophy of mind concentrates on two problems crucial to the philosopher's thoughts on the matter: the requirements for having a thought about a particular object and the problem of the mind's relation to the body. Della Rocca contends that Spinoza's positions are systematically connected with each other and with a principle at the heart of his metaphysical system: his denial of causal or explanatory relations between the mental and the physical. In this way, Della Rocca's exploration of these two problems provides a new and illuminating perspective on Spinoza's philosophy as a system.

A Historical Introduction to the Philosophy of Mind - Second Edition Peter Morton, 2010-05-06 This is an expanded and revised second edition of Peter Morton's highly acclaimed *A Historical Introduction to the Philosophy of Mind*, a text that combines primary readings with detailed commentary. The book has two aims: to present the philosophy of mind from a historical perspective so that the theories in the field are seen to emerge in the process of solving problems with earlier theories and to give students access to original source material together with commentaries that explain technical terms and jargon, outline argumentative structures, and place the texts in their historical context. The second edition adds several new chapters covering recent issues in the field and revises earlier chapters to improve the readings and update the commentaries.

Mental Reality, second edition, with a new appendix Galen Strawson, 2009-10-09 An argument against neobehaviorism and for naturalized Cartesianism which couples a wholly materialist approach to the mind with a fully realist attitude to the phenomena of conscious experience. In *Mental Reality*, Galen Strawson argues that much contemporary philosophy of mind gives undue primacy of place to publicly observable phenomena: nonmental phenomena and behavioral phenomena understood as publicly observable phenomena. In its account of the nature of mind, it does so at the expense of the phenomena of conscious experience. Strawson describes an alternative position: naturalized Cartesianism, which couples the materialist view that mind is entirely natural and wholly physical with a fully realist account of the nature of conscious experience. Naturalized Cartesianism is an adductive as opposed to reductive form of materialism. Adductive materialists don't claim that conscious experience is anything less than we ordinarily conceive it to be: in being wholly physical. They claim instead that the physical is something more than we ordinarily conceive it to be: given that many of the wholly physical goings on in the brain constitute literally are conscious experiences as we ordinarily conceive them. Since naturalized Cartesianism downgrades the place of reference to nonmental and publicly observable phenomena in an adequate account of mental phenomena, Strawson considers in detail the question of what part such reference still has to play. He argues that it is a mistake to think that all behavioral phenomena are publicly observable phenomena. This revised and expanded edition of *Mental Reality* includes a new appendix which thoroughly revises the account of intentionality given in chapter 7.
