Investigations 2006 Today's Math: Daily Practice Mixed Review Test Prep Grade 4, 2004-08 Investigations in Number Data and Space 2006 components for Grade 4 *Elementary Mathematics Curriculum Materials* Janine T.

Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors **Fifteen Minutes**

Libby Goodman, 1990-01-01 Focusing on the relationship between time use and learning results this book explores the instructional processes in special education classrooms The text emphasizes teacher control of time resources at the classroom level instructional management strategies that conserve and enhance instructional time and the efficient and effective use of learning time to enhance student performance outcomes The dual dimensions of time and task are incorporated throughout the text to communicate the essential message that time and the appropriate use of time go hand in hand in the classroom Adequate time alone is a necessary but insufficient condition for maximal learning to occur *Time and Learning in the Special Education Classroom* strikes a balance between research and application to achieve a scholarly yet
