Masterpieces Of Chicago Architecture:

Masterpieces of Chicago Architecture John Zukowsky, Martha Thorne, 2004 Over 200 illustrations drawn from the Art Institute of Chicago's repository of architectural drawings, models, and building fragments present a striking record of Chicago's great buildings and structures. *Chicago Architecture* The Chicago Architecture Foundation, Edward

Keegan, 2008-05-27 Universally recognized as an architectural center, Chicago contains some of the world's finest buildings by the most renowned architects of the nineteenth and twentieth centuries. Frank Lloyd Wright, Louis Sullivan, Mies van der Rohe, and many more left their stamp on the city's skyline and as a result influenced the practice of architecture across the globe. This book, published in association with the Chicago Architecture Foundation, features an in-depth analysis of forty-two seminal works of Chicago architecture. This accessible and engaging volume is the latest addition to the successful *Universe Architecture* Series. Both a guide for those visiting the city and a valuable reference for architecture enthusiasts, Chicago Architecture includes residential icons such as Mies van der Rohe's 860-880 Lake Shore Drive skyscraper prototypes, such as Sullivan's Schlesinger and Mayer Store, Carson Pirie Scott & Co., and engineering masterpieces such as Skidmore Owings

Merrill's Sears Tower. **Chicago Architecture and Design (3rd edition)** Jay Pridmore, George A. Larson, 2018-09-18 The birthplace of the skyscraper, Chicago is famous for an architectural tradition that has influenced building around the globe. It is the cradle of modern architecture. It gave rise to the urban office building and to the flowing open floor plans of today's homes. Chicago Architecture and Design chronicles the city's architecture from the 19th through the early 21st century, from the structural simplicity of Chicago School commercial building to the low-slung Prairie School house, from the streamlined Art Deco skyscraper to the minimalist Miesian tower of glass and steel, and all the way through to the strikingly original, diverse designs of the present day's second modern period. It examines the evolution of modern architecture in the context of broader historical, social, technological, and artistic currents, and explores innovations that pushed buildings ever higher. This third edition adds 10 new buildings from the last decade, including Renzo Piano's Modern Wing of the Art Institute, John

Ronan's Poetry Foundation, and Helmut Jahn's Mansueto Library at the University of Chicago. **Building Chicago** John Zukowsky, 2016-10-04 Building Chicago presents the best of this country's first city of architecture. Colloquially known as America's second city, Chicago is widely regarded as this country's crown jewel when it comes to architecture. The roster of masters who have helped shape its skyline and streetscape stands as a who's who of the architectural pantheon from the last two hundred years, from Louis Sullivan, Daniel Burnham, and Frank Lloyd Wright to Mies van der Rohe and Frank Gehry. Lavishly illustrated, this volume compellingly displays the masterworks of Chicago architecture from the Chicago Tribune Tower (1925) and the Rookery (1888) by Burnham Root to the Trump International Hotel and Tower (2008) by Skidmore Owings Merrill and the residential skyscraper Aqua (2009) by Jeanne Gang. It features the city's beloved masterpieces by Wright, including the Robie House, such milestones as the Willis Tower and the John Hancock Building, Gehry's Pritzker Bandshell, as

well as a wealth of little known treasures from Chicago's early days culled from the vast collection of the Chicago History Museum [The Space Within](#) Patrick F. Cannon, 2016 For the first time the interiors of some of the Chicago area's greatest buildings designed by celebrated architects are brought together and featured in truly stunning original photographs These Chicago area homes religious spaces and commercial and public structures give visual meaning to Frank Lloyd Wright's belief that the space within becomes the reality of the building Beginning with the Clarke House of 1836 and continuing to the present every type and style of building is presented Famous residences such as Wright's Robie House and Mies van der Rohe's Farnsworth House are here but so are more modest and not so modest homes by Walter Burley Griffin George Washington Maher and Paul Schweikher The ornate warmth of Adler Sullivan's Auditorium Building provides striking contrast to the modern towering underground stacks of Helmut Jahn's Mansueto Library The soaring Bah Temple by Louis Bourgeois is elegantly highlighted alongside a humble chapel in St Procopius Abbey Church by Edward Dart And commercial buildings by Daniel Burnham John Wellborn Root John Holabird Martin Roche and many more reaffirm Chicago's position as a great business center These architects and their contemporaries have made the Chicago area a mecca for both architects and lovers of architecture from around the world Text by author Patrick F Cannon who has lived and worked in Chicago and its suburbs for more than sixty years discusses each building's architecture architect and place in history James Caulfield a noted architectural photographer leads a visual tour into both the intimate and grand interiors of the Chicago area's finest buildings Now the duo's fifth book [The Space Within](#) demonstrates that good design comes in many styles While many of these architectural masterpieces are open to the public others particularly the private homes can only be seen here

Modern in the Middle Susan Benjamin, Michelangelo Sabatino, 2020-09-01 The first survey of the classic twentieth century houses that defined American Midwestern modernism

Famed as the birthplace of that icon of twentieth century architecture the skyscraper Chicago also cultivated a more humble but no less consequential form of modernism the private residence Modern in the Middle Chicago Houses 1929-75 explores the substantial yet overlooked role that Chicago and its suburbs played in the development of the modern single family house in the twentieth century In a city often associated with the outsize reputations of Frank Lloyd Wright and Ludwig Mies van der Rohe the examples discussed in this generously illustrated book expand and enrich the story of the region's built environment Authors Susan Benjamin and Michelangelo Sabatino survey dozens of influential houses by architects whose contributions are ripe for reappraisal such as Paul Schweikher Harry Weese Keck Keck and William Pereira From the bold early example of the Battledeck House by Henry Dubin 1930 to John Vinci and Lawrence Kenny's gem the Freeark House 1975 the generation spanning residences discussed here reveal how these architects contended with climate and natural setting while negotiating the dominant influences of Wright and Mies They also reveal how residential clients typically middle class professionals progressive in their thinking helped to trailblaze modern architecture in America Though reflecting different approaches to site space structure and materials the examples in Modern in the Middle reveal an abundance of astonishing houses that have never been collected into one study until now

Henry Ives Cobb's Chicago Edward W. Wolner,2011-06-15 When championing the commercial buildings and homes that made the Windy City famous one can't help but mention the brilliant names of their architects Daniel Burnham Louis Sullivan and Frank Lloyd Wright among others But few people are aware of Henry Ives Cobb 1859-1931 the man responsible for an extraordinarily rich chapter in the city's turn of the century building boom and fewer still realize Cobb's lasting importance as a designer of the private and public institutions that continue to enrich Chicago's exceptional architectural heritage Henry Ives Cobb's Chicago is the first book about this distinguished architect and the magnificent buildings he created including the Newberry Library the Chicago Historical Society the Chicago Athletic Association the Fisheries Building for the 1893 World's Fair and the Chicago Federal Building Cobb filled a huge institutional void with his inventive Romanesque and Gothic buildings something that the other architect giants occupied largely with residential and commercial work did not do Edward W Wolner argues that these constructions and the enterprises they housed including the first buildings and master plan for the University of Chicago signaled that the city had come of age that its leaders were finally pursuing the highest ambitions in the realms of culture and intellect Assembling a cast of colorful characters from a free wheeling age gone by and including over 140 images of Cobb's most creative buildings Henry Ives Cobb's Chicago is a rare achievement a dynamic portrait of an architect whose institutional designs decisively changed the city's identity during

its most critical phase of development [AIA Guide to Chicago](#) American Institute of Architects Chicago,2014-05-15 An unparalleled architectural powerhouse Chicago offers visitors and natives alike a panorama of styles and forms The third edition of the AIA Guide to Chicago brings readers up to date on ten years of dynamic changes with new entries on smaller projects as well as showcases like the Aqua building Trump Tower and Millennium Park Four hundred photos and thirty four specially commissioned maps make it easy to find each of the one thousand plus featured buildings while a comprehensive index organizes buildings by name and architect This edition also features an introduction providing an indispensable overview of Chicago s architectural history [The American Architect](#) ,1930
