G. Lister Sutcliffe,1904 Books in Print ,1991 *Forthcoming Books* Rose Arny,1991 *Sawdust in Your Pockets* Eric
Medlin,2023-10-15 During the twentieth century three industries tobacco textiles and furniture dominated the economy of
North Carolina The first two are well known and documented being the subject of numerous books movies and articles In
contrast the furniture industry has been mostly ignored by historians although at its height it was nearly as large and
influential as these other two concerns Furniture companies employed thousands of workers and shaped towns culture and
local life from Hickory to Goldsboro Sawdust in Your Pockets A History of the North Carolina Furniture Industry is the first
survey of the state s furniture industry from its cabinetmaking beginnings to its digital present Historian Eric Medlin shows
how the industry transitioned from high quality individual pieces to the affordable mass produced furniture of High Point and
Thomasville factories in the late nineteenth century He then traces the rise of the industry to its midcentury peak when
North Carolina became the largest furniture producing state in the country Medlin discusses how competition consolidation
and globalization challenged the furniture industry in the late twentieth century and how its businesses workers and
professionals have adapted and evolved to this day Subject Guide to Books in Print ,1997 **The Cabinet Maker and**

Artisans and Apprentices James Ayres,2014-06-30 Before the foundation of academies of art in London in 1758 and
Philadelphia in 1805 most individuals who were to emerge as artists trained in workshops of varying degrees of relevance
Easel painters began their careers apprenticed to carriage house sign or ship painters whilst a few were placed with those
who made pictures Sculptors emerged from a training as ornamental plasterers or carvers Of the many other trades in a
position to offer an appropriate background were limning staining engraving surveying chasing and die sinking In addition
plumbers gained the right to use oil painting and for plasterers the application of distemper was an extension of their trade
Central to the theme of this book is the notion that for those who were to become either painters or sculptor a training in a
trade met their practical needs This training was of an altogether different nature to an education in an art school In the past
prospective artists were offered by means of apprenticeships an empirical rather than a theoretical understanding of their
ultimate vocation James Ayres provides a lively account of the inter relationship between art and trade in the late

seventeenth to early nineteenth centuries in both Britain and North America He demonstrates with numerous illustrated examples the many cross overs in the art and mystery of artistic training and to modern eyes the sometimes incongruous relationships between the various trades that contributed to the blossoming of many artistic careers including some of the most illustrious names of the long eighteenth century *The Modern Carpenter Joiner and Cabinet-Maker* G. Lister Sutcliffe, 2001-02 This book includes Chapter VII of the 1902 volume on carpentry that presented techniques and tools that were up to date for its time Not all materials and methods described in these pages are suitable for the construction materials and tools of today Chapters description and delineation of roofs design and construction of roofs and floors and ceilings Includes numerous detailed drawings
