Math in My World: Read aloud anthology, 1998 **Playing Keira** Jennifer Castle, 2013-05-07 From a breakthrough voice in YA fiction comes a captivating digital original 50 page short story starring a supporting character from the novel *You Look Different in Real Life*. The premise was simple: Five kids living their real lives with a new movie about them every five years. But that was before Keira's mother walked out and the cameras captured every heartbreak detail for the world to see. Now Keira doesn't even know what real life means: she only knows how to pretend to be herself. Then she meets Garrett on a bus to New York City. At first Keira creates a fictional identity and enjoys the freedom of being someone totally different. But as their brief connection turns into something more, Keira starts to see what life could be like if she just stopped pretending and accepted the person she really is. Jennifer Castle's pitch perfect teen voices and sharp insights together with a teaser to *You Look Different in Real Life* make this story a must read especially for fans of Sarah Dessen. Epic Reads Impulse is a digital imprint with new releases each month. **Medical Math** Kieran Walsh, 2004 Uses mathematics in relations to medicine and health and shows how to keep the human body healthy. **Math for You and Me!**, 1998-01-01

Burn Math Class Jason Wilkes, 2016-03-22 A manifesto for a mathematical revolution Forget everything you've been taught about math In Burn Math Class Jason Wilkes takes the traditional approach to how we learn math with its unwelcoming textbooks unexplained rules and authoritarian assertions and sets it on fire Focusing on how mathematics is created rather than on mathematical facts Wilkes teaches the subject in a way that requires no memorization and no prior knowledge beyond addition and multiplication From these simple foundations Burn Math Class shows how mathematics can be re-invented from scratch without preexisting textbooks and courses We can discover math on our own through experimentation and failure without appealing to any outside authority When math is created free from arcane notations and pretentious jargon that hide the simplicity of mathematical concepts it can be understood organically and it becomes fun Following this unconventional approach Burn Math Class leads the reader from the basics of elementary arithmetic to various advanced topics such as time dilation in special relativity Taylor series and calculus in infinite dimensional spaces Along the way Wilkes argues that orthodox mathematics education has been teaching the subject backward calculus belongs before many of its so-called prerequisites and those prerequisites cannot be fully understood without calculus Like the smartest craziest teacher you've ever had Wilkes guides you on an adventure in mathematical creation that will radically change the way you think about math Revealing the beauty and simplicity of this timeless subject Burn Math Class turns everything that seems difficult about mathematics upside down and sideways until you understand just how easy math can be
