School, Family, and Community Partnerships Joyce L. Epstein, 2018-04-17

School Family and Community Partnerships: Preparing Educators and Improving Schools addresses a fundamental question in education today: How will colleges and universities prepare future teachers, administrators, counselors, and other education professionals to conduct effective programs of family and community involvement that contribute to students' success in school? The work of Joyce L. Epstein has advanced theories, research, policies, and practices of family and community involvement in elementary, middle, and high schools, districts, and states nationwide. In this second edition, she shows that there are new and better ways to organize programs of family and community involvement as essential components of district leadership and school improvement.

THE SECOND EDITION OFFERS EDUCATORS AND RESEARCHERS A framework for helping rising educators to develop comprehensive goal-linked programs of school-family and community partnerships. A clear discussion of the theory of overlapping spheres of influence, which asserts that schools, families, and communities share responsibility for student success in school. A historic overview and exploration of research on the nature and effects of parent involvement. Methods for applying the theory, framework, and research on partnerships in college course assignments, class discussions, projects, and activities, and field experiences. Examples that show how research-based approaches improve policies on partnerships, district leadership, and school programs of family and community involvement. Definitive and engaging.

School Family and Community Partnerships can be used as a main or supplementary text in courses on foundations of education, methods of teaching, educational administration, family and community relations, contemporary issues in education, sociology of education, sociology of the family, school psychology, social work, education policy, and other courses that prepare professionals to work in schools and with families and students.

RTI in Math William N. Bender, Darlene N. Crane, 2010-08-01

This map of the RTI process offers an overview of research, detailed guidance through each stage of implementation, tools for teacher reflection and growth, and discussion of support strategies beyond the classroom. The authors analyze a variety of common student difficulties in elementary math and apply a three-tier RTI model to the general education classroom.

Elementary School Math Kristen Gryskevich, 2014-06-11

Math instruction is changing. The subject is no longer taught the way it was when today's parents were in school. Keeping up and helping your elementary-grade child with math can be challenging and at times frustrating. This book offers the key to decreasing study and test anxieties and making math easier for your child.
