

CLINICAL JUDGMENT MEASUREMENT MODEL

A Framework to Measure Clinical Judgment & Decision Making

Measuring Clinical Judgment

NCSBN researchers developed the NCSBN Clinical Judgment Measurement Model (NCJMM) as a framework for the valid measurement of clinical judgment and decision making within the context of a standardized, high-stakes examination. While clinical judgment and decision-making have been important elements in most prelicensure education programs for many years, significant research and development were required to isolate and measure these traits with psychometric rigor.

To create the NCJMM, NCSBN researchers drew upon the prevailing literature in nursing, nurse pedagogy, cognitive psychology, psychological assessment and decision science related to decision making and nursing clinical judgment. In addition, multiple investigations were conducted involving over 100 nursing experts and analysis of data from more than 200,000 NCLEX candidates. The
