Nitric Oxide:

Nitric Oxide, Part F, 2011-09-02 The discovery that nitrogen monoxide or nitric oxide NO is a biologically produced free radical has revolutionized our thinking about physiological and pathological processes This discovery has ignited enormous interest in the scientific community When generated at low levels NO is a signaling molecule but at high concentration NO is a cytotoxic molecule The physiological and pathological processes of NO production and metabolism and its targets currently areas of intensive research have important pharmacologic implications for health and disease Nitric Oxide Louis J. Ignarro, 2000-09-13 Nitric oxide NO is a gas that transmits signals in an organism Signal transmission by a gas that is produced by one cell and which penetrates through membranes and regulates the function of another cell represents an entirely new principle for signaling in biological systems NO is a signal molecule of key importance for the cardiovascular system acting as a regulator of blood pressure and as a gatekeeper of blood flow to different organs NO also exerts a series of other functions such as acting a signal molecule in the nervous system and as a weapon against infections NO is present in most living creatures and made by many different types of cells NO research has led to new treatments for treating heart as well as lung diseases shock and impotence Scientists are currently testing whether NO can be used to stop the growth of cancerous tumors since the gas can induce programmed cell death apoptosis This book is the first comprehensive text on nitric oxide to cover all aspects basic biology chemistry pathobiology effects on various disease states and therapeutic implications Edited by Nobel Laureate Louis J Ignarro editor of the Academic Press journal Nitric Oxide Authored by world experts on nitric oxide Includes an overview of basic principles of biology and chemical biology Covers principles of pathobiology including the nervous system cardiovascular function pulmonary function and immune defense *The Role of Nitric Oxide in Heart Failure* Bodh I. Jugdutt, 2007-05-08 Research on nitric oxide NO is a very hot topic since 1998 when three prominent researchers were recognized by Nobel prize awards Addresses clinically pertinent issues related to nitric oxide in the pathophysiology and therapeutics of heart failure Chapters written by basic scientists and clinicians to emphasize translation character of research in nitric oxide An excellent reference source for researchers practitioners and students NO More Heart Disease Louis Ignarro, 2005-02 Dr Louis Ignarro discovered the atom of cardiovascular health a tiny molecule called Nitric Oxide NO as it is known by chemists is a signaling molecule produced by the body and is a vasodilator that helps control blood flow to every part of the body Dr Ignarro s findings led to the development of Viagra Nitric Oxide has a beneficial effect on the cardiovascular system as well NO relaxes and enlarges the blood vessels prevents blood clots that trigger strokes and heart attacks and regulates blood pressure and the accumulation of plaque in the blood vessels Dr Ignarro s current research indicates that Nitric Oxide may help lower cholesterol by facilitating the actions of statin drugs like Lipitor The goal of the regimen presented in NO More Heart Disease is to age proof the cardiovascular system keeping the vascular network clean and elastic through enhanced NO productivity The plan is easy to follow without

extreme lifestyle adjustments involving taking supplements to stimulate Nitric Oxide production incorporating NO friendly food into the diet and a moderate exercise program
