

No Left Turns

Charles Field Mason

No Left Turns:

No Left Turn Chris Trotter, 2010-12-01 A bold and passionate re examination of New Zealand political history by a leading social commentator The way some histories tell it Europeans came to New Zealand keen to establish a Little Britain in the South Seas Not so says Chris Trotter Most nineteenth century immigrants wanted something better than the misery and oppression of the world they had left and Trotter reveals just how close they and their descendants came to building a new one On each occasion however their achievements were resisted and ultimately overturned by those who saw New Zealand simply as a source of profits Trotter pulls no punches in describing the methods these partisans of profit used to ensure there was no Left turn jamming radio broadcasts political arson even murder From Massey s Cossacks to Muldoon s riot squads violence and repression have been the Right s weapons not the Left s Charting the evolution of New Zealand s unique brand of democratic socialism Trotter offers insightful and often surprising verdicts on the leading participants including John A Lee Peter Fraser Fintan Patrick Walsh David Lange and Helen Clark Passionately argued infused with poetic imagery and comprehensively researched No Left Turn is a unique and indispensable contribution to our political and social history an inspiration for anyone who puts money second and people first and a deliberate provocation to everyone else

Guidelines for the Use of No U-turn and No Left-turn Signs Stephen C. Brich, 1994 The objective of this study was to establish a set of written guidelines identifying traffic and road conditions where No U Turn and No Left Turn signs should be installed The effect of these signs on traffic safety was also investigated A questionnaire was sent to all Virginia Department of Transportation District Traffic Engineers selected city and county traffic engineers in Virginia and selected state city and county traffic engineers outside of Virginia asking about their current procedures for installing No U Turn and No Left Turn signs Eight signalized intersections where these signs had been installed were studied to determine the effect of the signs on left turn and U turn related accidents The signs reduced left turn and U turn related accident rates an average of 63 percent for the restricted movement and 66 percent for the intersection The decrease in accident numbers paralleled the decrease in accident rates a 59 percent reduction for the restricted movement and a 62 percent reduction for the intersection Based on the results from the questionnaire and a literature review guidelines were established to aid traffic engineers in determining where to install these signs
