Small Is Still Beautiful Joseph Pearce,2014-05-06 A third of a century ago E F Schumacher rang out a timely warning against the idolatry of giantism with his book Small Is Beautiful Since then millions of copies of Schumacher s work have been sold in dozens of different languages few books before or since have spoken so profoundly to urgent economic and social considerations Schumacher a highly respected economist and adviser to third world governments broke ranks with the accepted wisdom of his peers to warn of impending calamity if rampant consumerism technological dynamism and economic expansionism were not checked by human and environmental considerations Humanity was lurching blindly in the wrong direction argued Schumacher Its obsessive pursuit of wealth would not as so many believed ultimately lead to utopia but more probably to catastrophe Schumacher s greatest achievement was the fusion of ancient wisdom and modern economics in a language that encapsulated contemporary doubts and fears about the industrialized world The wisdom of the ages the perennial truths that have guided humanity throughout its history serves as a constant reminder to each new generation of the limits to human ambition But if this wisdom is a warning it is also a battle cry Schumacher saw that we needed to relearn the beauty of smallness of human scale technology and environments It was no coincidence that his book was subtitled Economics as if People Mattered Joseph Pearce revisits Schumacher s arguments and examines the multifarious ways in which Schumacher s ideas themselves still matter Faced though we are with fearful new technological possibilities and the continued centralization of power in large governmental and economic structures there is still the possibility of pursuing a saner and more sustainable vision for humanity Bigger is not always best Pearce reminds us and small is still beautiful

Food Britannia Andrew Webb,2012-08-31 British food has not traditionally been regarded as one

of the world's great cuisines and yet Stilton cheese Scottish raspberries Goosnargh duck and Welsh lamb are internationally renowned and celebrated. And then there are all those dishes and recipes that inspire passionate loyalty among the initiated. Whitby lemon buns and banoffi pie for example pan haggerty and Henderson's relish. All are as integral a part of the country's landscape as green fields, rolling hills and rocky coastline. In *Food Britannia* Andrew Webb travels the country to bring together a treasury of regional dishes, traditional recipes, outstanding ingredients and heroic local producers. He investigates the history of saffron farming in the UK, tastes the first whisky to be produced in Wales for one hundred years and tracks down the New Forest's foremost expert on wild mushrooms. And along the way he uncovers some historical surprises about our national cuisine. Did you know for example that the method for making clotted cream that stalwart of the cream tea was probably introduced from the Middle East? Or that our very own fish and chips may have started life as a Jewish Portuguese dish? Or that Alfred Bird invented his famous custard powder because his wife couldn't eat eggs? The result is a rich and kaleidoscopic survey of a remarkably vibrant food scene steeped in history but full of fresh ideas for the future. *Proof* if proof were needed that British food has come of age.

Perspective Taking: building a neurocognitive framework for integrating the "social" and the "spatial"

Klaus Kessler, Sarah H Creem-Regehr, Antonia Hamilton, 2015-06-08

Background: Interacting with other people involves spatial awareness of one's own body and the other's body and viewpoint. In the past social cognition has focused largely on belief reasoning which is abstracted away from spatial and bodily representations while there is a strong tradition of work on spatial and object representation which does not consider social interactions. These two domains have flourished independently. A small but growing body of research examines how awareness of space and body relates to the ability to interpret and interact with others. This also builds on the growing awareness that many cognitive processes are embodied which could be of relevance for the integration of the social and spatial domains. Online mental transformations of spatial representations have been shown to rely on simulated body movements and various aspects of social interaction have been related to the simulation of a conspecific's behaviour within the observer's bodily repertoire. Both dimensions of embodied transformations or mappings seem to serve the purpose of establishing alignment between the observer and a target. In spatial cognition research the target is spatially defined as a particular viewpoint or frame of reference. For yet in social interaction research another viewpoint is occupied by another's mind which crucially requires perspective taking in the sense of considering what another person experiences from a different viewpoint. Perspective taking has been studied in different ways within developmental psychology, cognitive psychology, psycholinguistics, neuropsychology and cognitive neuroscience over the last few decades. Yet integrative approaches for channelling all information into a unified account of perspective taking and viewpoint transformations have not been presented so far. Aims: This Research Topic aims to bring together the social and the spatial and to highlight findings and methods which can unify research across areas. In particular the topic aims to advance our current theories and set the

stage for future developments of the field by clarifying and linking theoretical concepts across disciplines Scope The focus of this Research Topic is on the SPATIAL and the SOCIAL and we anticipate that all submissions will touch on both aspects and will explicitly attempt to bridge conceptual gaps Social questions could include questions of how people judge another person's viewpoint or spatial capacities or how they imagine themselves from different points of view Spatial questions could include consideration of different physical configurations of the body and the arrangement of different viewpoints including mental rotation of objects or viewpoints that have social relevance Questions could also relate to how individual differences in personality sex development culture species etc influence or determine social and spatial perspective judgements Many different methods can be used to explore perspective taking including mental chronometry behavioural tasks EEG MEG and fMRI child development neuropsychological patients virtual reality and more Bringing together results and approaches from these different domains is a key aim of this Research Topic We welcome submissions of experimental papers reviews and theory papers which cover these topics

The Replacement Lindsey Duga, 2022-09-06 A girl is possessed by a ghost yearning to be free in this brand new spooky mystery by Lindsey Duga Do the dead deserve another chance Erin loves her new home in the country She has a big bedroom that overlooks a beautiful garden and there's even a treehouse in the backyard Everything is perfect except for the ghost At first the ghost is nothing more than a nuisance pulling Erin's hair coloring on the walls and getting Erin into heaps of trouble with her parents But things become even stranger when Erin starts losing her memory Sometimes it's only for a few minutes and other times it's for a few days It's almost as if she's fallen asleep Erin is convinced the ghost has been taking over her body but why It's up to Erin to figure out how to quell the ghost before it can get her into even more trouble or worse
