Richardson, 2005-03-01 In introducing this first volume of a series exploring issues in managing complexity Richardson Institute for the Study of Coherence and Emergence contends that no one has yet developed a reliable skill set for learning from the noise of complex systems **Organizational Knowledge Facilitation through Communities of Practice in Emerging Markets** Buckley, Sheryl, 2016-03-31 Communities of Practice are accessible to both experts and new members of a particular community with diverse academic and cultural backgrounds as well as varying social expectations and experiences Despite the tremendous opportunities for collective learning and knowledge sharing that Communities of Practice offer not enough is known about these communities in emerging economies and their potential to facilitate cooperation between experts from around the world Organizational Knowledge Facilitation through Communities of Practice and Emerging Markets seeks to fill the knowledge gap surrounding Communities of Practice and their role within developing nations Focusing on critical topics related to different types of knowledge communities and the ways in which such communities generate innovation this research based publication is an ideal reference source for academics business professionals researchers entrepreneurs and those currently studying at the graduate level *Virtual Communities: Concepts, Methodologies, Tools and Applications* Management Association, Information Resources, 2010-10-31 Covers the development design and utilization of virtual organizations and communities and the resulting impact of these venues **Virtual Communities** Felicia Wu Song, 2009 Does contemporary Internet technology strengthen civic engagement and democratic practice The recent surge in online community participation has become a cultural phenomenon enmeshed in ongoing debates about the health of American civil society But observations

about online communities often concentrate on ascertaining the true nature of community and democracy typically rehearsing familiar communitarian and liberal perspectives This book seeks to understand the technology on its own terms focusing on how the technological and organizational configurations of online communities frame our contemporary beliefs and assumptions about community and the individual It analyzes key structural features of thirty award winning online community websites to show that while the values of individual autonomy egalitarianism and freedom of speech dominate the discursive content of these communities the practical realities of online life are clearly marked by exclusivity and the demands of commercialization and corporate surveillance Promises of social empowerment are framed within consumer and therapeutic frameworks that undermine their democratic efficacy As a result online communities fail to revolutionize the civic landscape because they create cultures of membership that epitomize the commodification of community and public life altogether
