A Theory of Economic Sanctions Pa-ran Han,2012 This paper presents a work horse model to analyze the mechanism of triadic sanctions where the receiver of the sanction is not the actual target With a motivating example of the US sanctions against Iran and a simple game theoretic framework we show that the threat of such sanction is not credible in situations where the game ends after single stage or when the entities are not concerned with future transactions amongst each other In a repeated game setting on the other hand the threats become credible but the level of enforcement would differ across firms countries depending on the economic interdependency and how the parties perceive the probability that the games would continue to the next period

**How EU Sanctions Work: A New Narrative** Francesco Giumelli,2022 Making it Work Catherine G. Haight,2002 Are Sanctions Meant to Work? The Politics of Creating and Implementing Sanctions Through the United Nations Simon Chesterman,2014 Do sanctions work The jury remains out on this question but two preliminary issues bear further examination also What are sanctions intended to achieve And do states actually want sanctions to work These essentially political questions depend on two discrete dynamics that are the subject of this article which focuses on sanctions imposed by the UN Security Council The first is the political context of the Council and how the intentions of key actors are channelled into sanctions regimes The second is the political economy in which those sanctions operate Through a survey of UN practice over the past decade the two areas are examined in turn followed by an examination of how to advance debate both inside and outside the United Nations

Coercive Sanctions and International Conflicts Mark Daniel Jaeger, 2018-05-11 Perhaps the most common question raised in the literature on coercive international sanctions is Do sanctions work Unsurprisingly the answer to such a sweeping question remains inconclusive However even the widely presumed logic of coercive sanctions that economic impact translates into effective political pressure is not the primary driver of conflict developments Furthermore existing rationalist economic approaches neglect one of the most striking differences seen across sanctions conflicts the occurrence of positive sanctions or their combination with negative sanctions implicitly taking them as logically indifferent Instead of asking whether sanctions work this book addresses a more basic question How do coercive international sanctions work and more substantially what are the social conditions within sanctions conflicts that are conducive to either cooperation or non cooperation Arguing that coercive sanctions and international conflicts are relational socially constructed facts the author explores the de escalation of sanctions conflicts from a sociological perspective Whether sanctions are conducive to either cooperation or non cooperation depends on the one hand on the meaning they acquire for opponents as inducing decisions upon mutual conflict On the other hand negative sanctions positive sanctions or their combination each contribute differently to the way in which opponents perceive conflict and to its potential transformation Thus it is premature to predict the political effectiveness of sanctions simply based on economic impact The book presents analyses of the sanctions conflicts between China and Taiwan and over Iran's nuclear program illustrating how negative sanctions positive sanctions and their combination made a distinct contribution to conflict development and prospects for cooperation It will be of great interest to

researchers postgraduates and academics in the fields of international relations sanctions international security and international political sociology
