Mirror Of America Literary Encounters With The National Parks:

Mirror of America David Harmon,1989 *Mirror of America* David Harmon,1989 An anthology of writings on the national parks by major writers including Twain Muir Emerson and Stegner Petrified Forest National Park George M. Lubick,1996-04 Yellowstone Yosemite the Grand Canyon a few American national parks enjoy amusement park status eclipsing many other beautiful and significant parks due to their heavy political support and spectacular sights Visitors to Petrified Forest National Park in northeastern Arizona can escape from the litter snack bars and crowds of the recreational parks to a 200 million year old ecosystem locked in stone Enhanced by the unrivaled colorful beauty of the adjacent Painted Desert Petrified Forest National Park has captivated visitors since the area was discovered by early explorers The history of the huge fossilized forest parallels that of Arizona It was discovered and looted by adventurers and largely ignored by the government until President Theodore Roosevelt made it a national monument in 1906 The forest s location along Route 66 brought a large number of visitors during the time it enjoyed only monument status but lack of funding for protection allowed much damage and theft of fossilized wood Petrified Forest National Park A Wilderness Bound in Time speeds the reader on an ancient ecological journey from the time of dinosaurs to the discovery of their Triassic fossils and on through a century of political maneuvering to create a place for the forest in American history George Lubick describes how a dedicated few understood the environmental importance as well as the unique beauty of the park s Triassic Chinle Formation and the Painted Desert Nearly a million people visit the Triassic annually this environmental history of the ancient forest is important for those who know the park as well as those interested in natural America Petrified Forest National Park is one of the few complete histories of any national park a well told balanced treatment of the environmental political and historical factors that shape America s natural history *For the Enjoyment of the People* Mary E. Stuckey,2023-07-25 National parks are widely revered as America s best idea they are abundantly popular and remarkably noncontroversial in the United States American presidents use these parks to stake their claims to environmentalism assert a singular national history and define a unified national identity often doing so inside the parks themselves However the establishment and history of almost every national park has been riddled with conflict over competing claims to land knowledge and economic interests Like any major area of public policy the fissures present in debates over the national parks also represent important fracture lines in the public understanding of the meaning of America and of individual claims to citizenship The park system in other words does a lot of political work for both presidents and the mass public even though much of that work goes largely unnoticed This book explores that political work by addressing themes of national origins and the dispossession of Indigenous peoples monuments to the national past heritage and the assertion of a national narrative environmentalism and natural resources and exploitation of the national landscape for economic gain In *For the Enjoyment of the People* Mary Stuckey looks at the politics of the parks as well as what the parks can teach us about citizenship and what it means to be American Stuckey

asserts that through the national parks we can hope to explain the past clarify the present and project the future Combining interdisciplinary conversations about tourism public memory national history park history the presidency and national identity Stuckey contributes insightful ideas to the conversation on the history of national parks while examining the natural military and patriotic nature of America's best idea

The Vortex Frank Uekötter, 2024-04-18

Environmental challenges are defining the twenty first century To fully understand ongoing debates about our current crises climate change loss of biological diversity pollution extinction resource woes means revisiting their origins in all their complexity With this ambitious highly original contribution to the environmental history of global modernity Frank Uekötter considers the many ways humans have had an impact on their physical environment throughout history Ours is not a one way trajectory to sudden collapse he argues but rather death by a thousand cuts The many paths we've forged to arrive in our current predicament from agriculture to industry to infrastructure must be considered collectively if we are to stay afloat in what Uekötter describes as a vortex a powerful metaphor for the flow of history capturing the momentum and the many crosscurrents that swept people and environments along His book invites us to look at environmental challenges from multiple perspectives including all the twists and turns that have helped to create the mess we find ourselves in Uekötter has written a world history for an age where things are falling apart where we know what lies ahead and are equipped with the right tools technological and otherwise and plenty of experience to deal with environmental challenges but somehow fail to get our affairs in order

Windshield Wilderness David Louter, 2009-11-23

In his engaging book *Windshield Wilderness* David Louter explores the relationship between automobiles and national parks and how together they have shaped our ideas of wilderness National parks he argues did not develop as places set aside from the modern world but rather came to be known and appreciated through technological progress in the form of cars and roads leaving an enduring legacy of knowing nature through machines With a lively style and striking illustrations Louter traces the history of Washington State's national parks Mount Rainier Olympic and North Cascades to illustrate shifting ideas of wilderness as scenic as roadless and as ecological reserve He reminds us that we cannot understand national parks without recognizing that cars have been central to how people experience and interpret their meaning and especially how they perceive them as wild places *Windshield Wilderness* explores what few histories of national parks address what it means to view parks from the road and through a windshield Building upon recent interpretations of wilderness as a cultural construct rather than as a pure state of nature the story of autos in parks presents the preservation of wilderness as a dynamic and nuanced process *Windshield Wilderness* illuminates the difficulty of separating human modified landscapes from natural ones encouraging us to recognize our connections with nature in national parks
