Mirrors In Mind:

Mirrors in Mind Richard Langton Gregory, 1997-01 Offers a look at the important roles mirrors have played in science history and art *Mirrors in Mind* Richard Gregory, 1998 The author ranges across the mythology and history of mirrors their use in art and literature and the sciences of images and light showing how our experience of mirrors and optical illusions can help to unravel the puzzles that lie in our own confused perceptions **Mirrors of Mind** Charles Roberts, J. Louis Schlegel, 3rd, Carole L. Trachy, 1985 There are two unifying concepts which are used as themes throughout this text They are objectivity and subjectivity Preface **Mirrors of Mind** Joanna Paul, Charles Roberts, J. Louis Schlegel, Helen Parramore Twigg, Roberta Vendermast, 1975 **Mirrors of Mind** , 1980 The Word , 1916 The Mind's Eye Jeffrey F. Hamburger, Anne-Marie Bouché, 2006 The Mind's Eye focuses on the relationships among art theology exegesis and literature issues long central to the study of medieval art yet ripe for reconsideration Essays by leading scholars from many fields examine the illustration of theological commentaries the use of images to expound or disseminate doctrine the role of images within theological discourse the development of doctrine in response to images and the place of vision and the visual in theological thought At issue are the ways in which theologians responded to the images that we call art and in which images entered into dialogue with theological discourse In what ways could medieval art be construed as argumentative in structure as well as in function Are any of the modes of representation in medieval art analogous to those found in texts In what ways did images function as vehicles not merely vessels of meaning and signification To what extent can exegesis and other genres of theological discourse shed light on the form as well as the content and function of medieval images These are only some of the challenging questions posed by this unprecedented and interdisciplinary collection which provides a historical framework within which to reconsider the relationship between seeing and thinking perception and the imagination in the Middle Ages
