Crafting the Natural Light Look Sandra Coan, 2020-01-31 Learn to use a one light approach for

recreating the look of beautiful natural window light for portraiture. At its best natural light is magical for portraiture. The quality of natural light streaming through a window can be extraordinary, gorgeous wrapping light that flatters your subject and can be used to create multiple looks. For years photographer Sandra Coan exclusively used natural light in her portraiture work. And while the results could be magnificent, she also learned that she could not rely on it to build a business and create consistently great photographs. That's because natural light is frustratingly unpredictable; sometimes it rains, sometimes the light is too harsh when your clients are available, and sometimes depending on the time of year it's just too dark. In order to grow her business with dependably great results and a high level of professionalism, Sandra finally decided to tackle artificial light. She spent years honing her ability to use artificial light to recreate the look of beautiful natural light. And now with a simple one-light approach, she produces natural light whenever and wherever she likes, creating great portraits in any situation at any time of day or night. It's an approach that has led to a successful career spanning two decades and a signature look to her work. Here in *Crafting the Natural Light Look*, Sandra shares her knowledge and techniques so that you too can learn to quickly and dependably create the look of natural light in your own portraiture. Unlike other books that address artificial light, Sandra's tone is conversational and easygoing, and she does not cover everything there is to know about artificial light. In fact, there are no two- or three-light setups here. Instead, Sandra's method is straightforward and easily actionable. She covers the key characteristics of light, intensity, distance, direction, equipment, strobes, flashes, light meters, triggers, receivers, modifiers, reflectors, and light stands, including what she uses and what she recommends if starting out on a budget. Shutter speed and its relationship with artificial light. Where to position the light and the subject for consistent flattering results. Creating four lighting patterns and looks with one setup: flat light, loop light, side light, and backlight. Using a light meter to determine the perfect flash power whether you shoot film or digital. Working with individuals, families, and groups. The role of shadows in its contribution to the drama and mood of a portrait. Common mistakes and how to avoid them. What she does in post production very little. Finally, in a series of case studies, she brings it all together and shares her thought process as she works through a number of real-world portrait shoots from start to finish. If you're a natural-light photographer who's been either struggling with flash or reluctant to learn it at all, *Crafting the Natural Light Look* is exactly the book you need to improve the quality and consistency of your portraiture.

Portraiture Unplugged Carl Caylor, 2015-06-22

Good lighting is everything in portraiture. The right light sculpts our subjects, smooths the skin, evens skin tones, and helps create the feeling of a third dimension in a two-dimensional image. The gold standard of lighting has for the better part of a century been produced by artificial lights, hot lights, or strobes in the studio. These sources allow for precise lighting effects on demand. However, artificial light cannot match the beauty or ambience that gorgeous natural light creates, and studio lighting can break the bank. In part 1 of this book, Carl Caylor introduces readers to a failproof method for understanding, shaping, and harnessing natural light for dazzling results that rival studio lighting looks. Using your powers of

observation an understanding of the physics of light and employing a couple of inexpensive tools reflector panels to bounce light and a gobo to block light Caylor shows you how to make the most of the sunlight for indoor and outdoor location shoots and even studio work You ll learn how to tweak the direction of light and manipulate lighting angles to re create classic portrait lighting styles short lighting broad lighting Rembrandt lighting and more that flatter and contour your subjects facial structures to make them look their very best In part 2 of the book Carl provides an in depth analysis into the techniques he used to create 60 beautiful natural light portraits in myriad locations and circumstances producing a wide range of portrait looks Readers will learn how to integrate other elements that are important to building an effective portrait including prop selection wardrobe composition expression posing and even planning for a top notch contrasty black white shot The text in this book along with inspirational images will coax many readers to enjoy a back to basics approach that will allow them to produce technically exquisite and profoundly artful flattering portraits that will sell themselves to clients every time
