Natural Minds:

Natural Minds Thomas W. Polger, 2006-01-20 In *Natural Minds* Thomas Polger advocates and defends the philosophical theory that mind equals brain that sensations are brain processes and in doing so brings the mind brain identity theory back into the philosophical debate about consciousness. The version of identity theory that Polger advocates holds that conscious processes events states or properties are type identical to biological processes events states or properties. A tough minded account that maintains that minds are necessarily identical to brains a position held by few current identity theorists. Polger's approach to what William James called the great blooming buzzing confusion of consciousness begins with the idea that we need to know more about brains in order to understand consciousness fully but recognizes that biology alone cannot provide the entire explanation. *Natural Minds* takes on issues from philosophy of mind philosophy of science and metaphysics moving freely among them in its discussion. Polger begins by answering two major objections to identity theory. Hilary Putnam's argument from multiple realizability which discounts identity theory because creatures with brains unlike ours could also have mental states and Saul Kripke's modal argument against mind brain identity based on the apparent contingency of the identity statement. He then offers a detailed account of functionalism and functional realization which offer the most serious obstacle to consideration of identity theory. Polger argues that identity theory can itself satisfy the kind of explanatory demands that are often believed to favor functionalism.

[Natural:Mind](#) Vilém Flusser, 2015-07-31 In *Natural Mind* published for the first time in São Paulo Brazil in 1979 Vilém Flusser investigates the paradoxical connection between the concepts of nature and culture through a lively para phenomenological analysis of natural and cultural phenomena. Can culture be considered natural and nature cultural? If culture is our natural habitat then do we not inhabit nature? These are only some of the questions that are raised in *Natural Mind* in order to examine our continual redefinition of both terms and what that means for us existentially. Always applying his fluid and imagistic Husserlian style of phenomenology Flusser explores different perspectives and relations of items from everyday life. The book is composed of a series of essays based on close observations of familiar objects such as paths valleys cows meadows trees fingers grass the moon and buttons. By focusing on things we mostly take for granted he manages not only to reveal some aspects of their real and obscured nature but also to radically change how we look at them. The ordinary cow will never be seen in the same way again.

Revised and updated for the twenty first century *The Natural Mind* suggests that the desire to alter consciousness periodically is an innate normal human drive. A landmark in his career and in America's approach to the drug problem in general *The Natural Mind* is essential reading for anyone interested in
