Natural Mother:

The Natural Mother of the Child Krys Malcolm Belc, 2021-06-15 Krys Malcolm Belc's visual memoir in essays explores how the experience of gestational parenthood conceiving, birthing, and breastfeeding his son Samson eventually clarified his gender identity. Krys Malcolm Belc has thought a lot about the interplay between parenthood and gender. As a nonbinary transmasculine parent giving birth to his son Samson, he clarified his gender identity. And yet when his partner Anna adopted Samson, the legal documents listed Belc as the natural mother of the child. By considering how the experiences contained under the umbrella of motherhood don't fully align with Belc's own experience, *The Natural Mother of the Child* journeys both toward and through common perceptions of what it means to have a body and how that body can influence the perception of a family. With this visual memoir in essays, Belc has created a new kind of life record, one that engages directly with the documentation often thought to constitute a record of one's life: childhood photos, birth certificates, and addresses. His deep ambivalence about the before and after is so prevalent in trans stories, which feels apart from his own experience. *The Natural Mother of the Child* is the story of a person moving past societal expectations to take control of his own narrative with prose that delights in the intimate dailiness of family life and explores how much we can ever really know when we enter into parenting.

Paradox Of Natural Mothering Chris Bobel, 2010-06-10 Single or married working mothers are, if not the norm, no longer exceptional. These days, women who stay at home to raise their children seem to be making a radical lifestyle choice. Indeed, the women at the center of *The Paradox of Natural Mothering* have renounced consumerism and careerism in order to reclaim home and family. These natural mothers favor parenting practices that set them apart from the mainstream: home birth, extended breast feeding, home schooling, and natural health care. Regarding themselves as part of a movement, natural mothers believe they are changing society one child, one family at a time. Author Chris Bobel profiles some thirty natural mothers, probing into their choices and asking whether they are reforming or conforming to women's traditional role. Bobel's subjects say that they have chosen to follow their nature rather than social imperatives. Embracing such lifestyle alternatives as voluntary simplicity and attachment parenting, they place family above status and personal achievement. Bobel illuminates the paradoxes of natural mothering: the ways in which these women resist the trappings of upward mobility but acquiesce to a kind of biological determinism and conventional gender scripts.
