Naturalistic Inquiry:

Naturalistic Inquiry Yvonna S. Lincoln, Egon G. Guba, 1985-04 Showing how science is limited by its dominant mode of investigation Lincoln and Guba propose an alternative paradigm a naturalistic rather than rationalistic method of inquiry in which the investigator avoids manipulating research outcomes A paradigm shift is under way in many fields they contend and go on to describe the different assumptions of the two approaches regarding the nature of reality subject object interaction the possibility of generalization the concept of causality and the role of values The authors also offer guidance for research in the field where they say naturalistic inquiry always takes place Useful tips are given for example on designing a study as it unfolds establishing trustworthiness and writing a case report This book helps researchers both to understand and to do naturalistic inquiry Of particular interest to educational researchers it is valuable for all social scientists involved with questions of qualitative and quantitative methodology

Doing Naturalistic Inquiry David A. Erlandson, Edward L.

Harris, Barbara L. Skipper, Steve D. Allen, 1993-07-07 While much has been written on alternative paradigm research there is little concrete advice on how to effectively use the theoretical notions of naturalistic inquiry in practice Doing Naturalistic Inquiry is the practical guide designed to help beginning researchers apply the constructivist paradigm Based upon the theoretical work of Lincoln and Guba in developing the naturalistic or constructivist paradigm Erlandson and his colleagues show readers how these ideas shape the practice of conducting alternative paradigm research The book covers the research process from design through data collection analysis and presentation and examines important issues generally minimized in positivist research texts ethics trustworthiness and authenticity Cases from a wide variety of disciplines demonstrate the efficacy of the methods described Doing Naturalistic Inquiry is a highly useful teaching tool for anyone using a constructivist lens on research

Naturalistic Inquiry for Library Science Constance Mellon, 1990-03-09 Research does not have to mean getting buried in statistics claims Constance Mellon and in this unique study she describes an approach to applying the naturalistic

inquiry of anthropology and sociology to the field of information science Drawing on the author's experience in the design of instruction the book outlines a humanistic and relevant method of naturalistic research whose aim is understanding rather

than prediction Unlike other books on the topic here the method is directed specifically toward librarianship and its particular needs and problems and made clear through a series of concrete examples Not only is it the first book of its kind in the field but its direct and simple style will make it accessible to everyone from beginners to experienced researchers The

book explains in a step by step fashion the various aspects of naturalistic inquiry with the chapters following an organization similar to the stages of a study Chapters 1 and 2 provide a background to the theory of such studies as well as practice

studies that can aid new researchers in getting started chapters 3 through 5 describe the methodology of naturalistic inquiry including data collection analysis and report writing and the final three chapters present a variety of practical suggestions

for applying naturalistic inquiry to the library field This volume will be an appropriate text for courses in quantitative research methods and library information studies sociology anthropology and education It will also be a relevant work for

librarians and administrators interested in research methods and evaluation and a valuable addition to both university and public libraries
