Nature and Culture : American Landscape and Painting, 1825-1875, With a New Preface Barbara Novak Altschul Professor of Art History Barnard College and Columbia University (Emerita), 2007-01-05 In this richly illustrated volume featuring more than fifty black and white illustrations and a beautiful eight page color insert Barbara Novak describes how for fifty extraordinary years American society drew from the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals Novak illuminates the range of ideas projected onto the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz H Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau and Frederich Wilhelm von Schelling Now with a new preface this spectacular volume captures a vast cultural panorama It beautifully demonstrates how the idea of nature served not only as a vehicle for artistic creation but as its ideal form An impressive achievement Barbara Rose The New York Times Book Review An admirable blend of ambition elan and hard research Not just an art book it bears on some of the deepest fantasies of American culture as a whole Robert Hughes Time Magazine *Nature and Culture* Barbara Novak, 2007-01 In this illustrated volume including a number of stunning color prints the author explains that for fifty extraordinary years American society bestowed in the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny During these years Nature God and Man converged to become a trinity and it was through the landscape painters the leaders of this intellectual movement that the nation was reminded of divine benevolence by keeping before their eyes the mountains trees forests and lakes Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals the author illuminates the range of ideas projected on to the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz Hugh Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau William Wordsworth Theodore Rousseau and Frederich Wilhelm Schelling Adding a new dimension to the discussion of nature's influence on the American mind she explains how religion philosophy science and literature served as the support system for the idea of God in Nature She shows that the idea of nature as a national vested interest was invaluable to a young expanding nation but ultimately this essentially monolithic view collapsed from within undermined by the Civil War Darwinism and a burgeoning technological landscape Taking American landscape painting in its golden era as a product of society she examines the cultural background of paintings as an index to their intrinsic meaning She explains for example how new discoveries in science were made consonant with Deity how religion itself permeated nature with the idea of Creation and how the landscape artists were given

the task of providing the images of nature that became the national iconography She goes on to demonstrate how American landscapists handling rocks clouds plants and other natural elements paralleled and diverged from scientific developments and also how the landscapists who accompanied explorers on their westward expeditions related to their scientific colleagues With a new introduction this volume encompasses a vast cultural panorama It demonstrates how the influence of the nature served not only as a vehicle for artistic creation but as its ideal form

American Nature and Culture Barbara Novak,2023 In this second volume of her trilogy on American art and culture Novak explains that for 50 extraordinary years American society bestowed in the idea of Nature its most cherished ideals

The Anatomy of Nature

Rebecca Bedell,2024-05-14 An illuminating account of the interplay between science religion and nature in nineteenth century landscape painting Geology was in vogue in nineteenth century America People crowded lecture halls to hear geologists speak and parlor mineral cabinets signaled social respectability and intellectual engagement This was also the heyday of the Hudson River School and many prominent landscape painters avidly studied geology Thomas Cole Asher Durand Frederic Church John F Kensett William Stanley Haseltine Thomas Moran and other artists read scientific texts participated in geological surveys and carried rock hammers into the field to collect fossils and mineral specimens As they crafted their paintings these artists drew on their geological knowledge to shape new vocabularies of landscape elements resonant with moral spiritual and intellectual ideas Rebecca Bedell contributes to current debates about the relationship among art science and religion by exploring this phenomenon She shows that at a time when many geologists sought to disentangle their science from religion American artists generally sidestepped the era's more materialist science particularly Darwinism They favored a conservative Christianized geology that promoted scientific study as a way to understand God Their art was both shaped by and sought to preserve this threatened version of the science And through their art they advanced consequential social developments including westward expansion scenic tourism the emergence of a therapeutic culture and the creation of a coherent and cohesive national identity This major study of the Hudson River School offers an unprecedented account of the role of geology in nineteenth century landscape painting It yields fresh insights into some of the most influential works of American art and enriches our understanding of the relationship between art and nature and between science and religion in the nineteenth century It will draw a broad audience of art historians Americanists historians of science and readers interested in the American natural landscape

Landscape and Western Art Malcolm Andrews,1999

Public Culture

Marguerite S. Shaffer, 2012-04-17 In the United States today many people are as likely to identify themselves by their ethnicity or region as by their nationality. In this country with its diversity and inequalities can there be a shared public culture? Is there an unbridgeable gap between cultural variety and civic unity or can public forms of expression provide an opportunity for Americans to come together as a people? In *Public Culture* Diversity, Democracy, and Community in the United States an interdisciplinary group of scholars addresses these questions while considering the state of American public culture over the past one hundred years. From medicine shows to the Internet from the Los Angeles Plaza to the Las Vegas Strip from the commemoration of the Oklahoma City bombing to television programming after 9/11 public sights and scenes provide ways to negotiate new forms of belonging in a diverse postmodern community. By analyzing these cultural phenomena the essays in this volume reveal how mass media consumerism increased privatization of space and growing political polarization have transformed public culture and the very notion of the American public. Focusing on four central themes public action, public image, public space, and public identity and approaching shared culture from a range of disciplines including mass communication, history, sociology, urban studies, ethnic studies, and cultural studies, *Public Culture* offers refreshing perspectives on a subject of perennial significance.

Nature and Culture Barbara Novak, 1980 **The**

Sea in the Literary Imagination Ekaterina V. Kobeleva, Ben P. Robertson, Shannon W. Thompson, 2019-01-03 This collection explores nautical themes in a variety of literary contexts from multiple cultures. Including contributors from five continents it emphasizes the universality of human experience with the sea while focusing on literature that spans a millennium stretching from medieval romance to the twenty first century reimagining of classic literary texts in film. These fresh essays engage in discussions of literature from the UK, the USA, India, Chile, Turkey, Spain, Japan, Colombia, and the Caribbean. Scholars of maritime literature will find the collection interesting for the unique insights it offers on individual literary texts while general readers will be intrigued by the interconnectedness that it reveals in human experience with the sea.

The Anatomy of Nature Rebecca Bailey Bedell, 2001 Geology was in vogue in nineteenth century America. People crowded lecture halls to hear geologists speak and parlor mineral cabinets signaled social respectability and intellectual engagement. This was also the heyday of the Hudson River School and many prominent landscape painters avidly studied geology. Thomas Cole, Asher Durand, Frederic Church, John F. Kensett, William Stanley Haseltine, Thomas Moran, and other artists read scientific texts, participated in geological surveys, and carried rock hammers into the field to collect fossils and mineral specimens. As they crafted their paintings these artists drew on their geological knowledge to shape new vocabularies of landscape elements resonant with moral, spiritual, and intellectual ideas. Rebecca Bedell contributes to current debates about the relationship among art, science, and religion by exploring this phenomenon. She shows that at a time when many geologists sought to disentangle their science from religion, American artists generally sidestepped the era's more materialist science, particularly Darwinism. They favored a conservative Christianized geology that promoted scientific study.

as a way to understand God Their art was both shaped by and sought to preserve this threatened version of the science And through their art they advanced consequential social developments including westward expansion scenic tourism the emergence of a therapeutic culture and the creation of a coherent and cohesive national identity This major study of the Hudson River School offers an unprecedented account of the role of geology in nineteenth century landscape painting It yields fresh insights into some of the most influential works of American art and enriches our understanding of the relationship between art and nature and between science and religion in the nineteenth century It will draw a broad audience of art historians Americanists historians of science and readers interested in the American natural landscape

The Changing American Countryside Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life *Landscapes of Culture and Nature* Rod Gblett,2009-09-29 This book is a bold and exciting exploration of the relationship and interactions between humans the human landscape and the earth looking at a diverse range of case studies from the nineteenth century city to the Asian tsunami and Hurricane Katrina *African-American Art* Sharon F.
