Nature In The City:

Urban Jungle Ben Wilson, 2023-12-12 In this exhilarating look at cities past and future Ben Wilson proposes that in our world of rising seas and threatening weather the natural world may prove the city's savior Illuminating Wilson leaves readers with hope about the future of efforts to preserve the ecosystems that surround us as well as a new perspective that looks beyond the concrete and asphalt when walking along a city's streets Associated Press Since the beginning of civilization humans have built cities to wall nature out then glorified it in beloved but quite artificial parks In *Urban Jungle* Ben Wilson the author of *Metropolis* a seven thousand year history of cities that the Wall Street Journal called a towering achievement looks to the fraught relationship between nature and the city for clues to how the planet can survive in an age of climate crisis Whether it was the market farmers of Paris Germans in medieval forest cities or the Aztecs in the floating city of Tenochtitlan pre modern humans had an essential bond with nature But when the day came that water was piped in and food flown from distant fields that relationship was lost Today urban areas are the fastest growing habitat on Earth and in *Urban Jungle* Ben Wilson finds that we are at last acknowledging that human engineering is not enough to protect us from extremes of weather He takes us to places where efforts to rewild the city are under way to Los Angeles where the city's concrete river will run blue again to New York City where a bleak landfill will be a vast grassland preserve The pinnacle of this strategy will be Amsterdam a city that is its own ecosystem that makes no waste and produces its own energy In many cities Wilson finds nature is already thriving Koalas are settling in Brisbane wild boar may raid your picnic in Berlin Green canopies wildflowers wildlife the things that will help cities survive he notes also make people happy *Urban Jungle* offers the pleasures of history how backyard gardens spread exotic species all over the world how war produces biodiversity alongside a fantastic vision of the lush green cities of our future Climate change Ben Wilson believes is only the latest chapter in the dramatic human story of nature and the city

City Safari Jenette Restivo, 2025-10-21 City Safari invites young explorers to look beyond the concrete and see their city in a whole new light At first glance a city block might seem like a gray wasteland cracked sidewalks over trimmed trees endless buildings But look a little closer and a hidden world comes to life High above squirrels nest in tangled treetops Raptors perch on skyscraper ledges Pigeons raise chicks on parking garage beams An owl might be dozing in a hollow tree and a crevice in a stone wall could be the front door to a rodent's home Urban nature is everywhere if you know how to find it Part natural history guide part adventure manual City Safari helps middle grade readers become urban naturalists developing a sharp eye for wildlife hiding in plain sight With engaging facts fieldwork activities and a fresh perspective on everyday surroundings this book turns the city into a thrilling wilderness waiting to be discovered

The Nature of Cities Michael Bennett, David W. Teague, 2021-10-12 Cities are often thought to be separate from nature but recent trends in ecocriticism demand that we consider them as part of the total environment This new collection of essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture The editors both raised in small towns but now living in major urban areas are especially concerned with the sociopolitical construction of all environments both natural and manmade Following an opening interview with Andrew Ross exploring the general parameters of urban ecocriticism they present essays that explore urban nature writing city parks urban wilderness ecofeminism and the city and urban space The volume includes contributions on topics as wide ranging as the urban poetry of English writers from Donne to Gay the manufactured wildness of a gambling casino and the marketing of cosmetics to urban women by idealizing Third World naturalness These essays seek to reconceive nature and its cultural representations in ways that contribute to understanding the contemporary cityscape They explore the theoretical issues that arise when one attempts to adopt and adapt an environmental perspective for analyzing urban life The Nature of Cities offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban experience the book makes a statement of lasting importance to the development of the ecocritical movement

[The Cincinnati Arch](#) John Tallmadge, 2004 What wilderness lover asks John Tallmadge would ever dream of settling deep in the Rust Belt astride polluted rivers The Cincinnati Arch holds the

provocative answer to Tallmadge's question which was prompted by his unplanned relocation from rural Minnesota to urban Ohio Tallmadge tells of dismaying early encounters with the city's seeming barrenness his growing awareness of its vitality and abundance and finally his new vision of all nature from the vacant lots of his neighborhood to our great New England forests and Western deserts New to the city Tallmadge saw only its concrete glass smog and debris Soon his interest stirred by the wonder of his children at their surroundings focused Tallmadge to the buzzing flapping scurrying chewing photosynthesizing life forms around him More deeply Tallmadge began to learn from and not just about the city Nature's persistence within him and wherever he looked wore away at old notions of wilderness that made no allowances for human culture The arch of the book's title is richly resonant as the name of a geologic formation molding the urban landscape Tallmadge comes to love as an archetypal building form and in its parabolic shape as a metaphor for life's journey Filled with luminous lessons of mindfulness attentiveness and other spiritual practices this is a hopeful guide to finding nature and balance in unlikely places

Nature and the City Gene Desfor, Roger Keil, 2004-09 Pollution of air soil and waterways has become a primary concern of urban environmental policy making and over the past two decades there has emerged a new era of urban policy that links development with ecological issues based on the notion that both nature and the economy can be enhanced through technological changes to production and consumption systems This book takes a new look at this application of ecological modernization to contemporary urban political ecological struggles Considering policy processes around land use in urban watersheds and pollution of air and soil in two disparate North American global cities it criticizes the dominant belief in the power of markets and experts to regulate environments to everyone's benefit arguing instead that civil political action by local constituencies can influence the establishment of beneficial policies The book emphasizes subaltern environmental justice concerns as instrumental in shaping the policy process Looking back to the 1990s when ecological modernization began to emerge as a dominant approach to environmental policy and theory Desfor and Keil examine four case studies restoration of the Don River in Toronto cleanup of contaminated soil in Toronto regeneration of the Los Angeles River and air pollution reduction in Los Angeles In each case they show that local constituencies can develop political strategies that create alternatives to ecological modernization When environmental policies appear to have been produced through solely technical exercises they warn one must be suspicious about the removal of contention from the process In the face of economic and environmental processes that have been increasingly influenced by neo liberalism and globalization Desfor and Keil's analysis posits that continuing modernization of industrial capitalist societies entails a measure of deliberate change to societal relationships with nature in cities Their book shows that environmental policies are about much more than green capitalism or the technical mastery of problems they are about how future urban generations live their lives with sustainability and justice
