**Nature and the Environment in Twentieth-Century American Life** Brian Black,2006-05-30 Americans during the twentieth century became more disconnected from the environment and nature than ever before More Americans lived in cities rather than on farms they became ever more reliant on technology to interact with the world around them and with each other Perhaps paradoxically the twentieth century also became the period in which environmental issues played an ever increasing role in politics and public policy Why is this so Perhaps because despite what many people believe nature and the environment remains central to everyone's daily life Pollution environmental degradation urban sprawl loss of wildlife and biodiversity all of these issues directly impact how everyone even city dwellers live their lives Nature and the Environment in Twentieth
