**NBER Macroeconomics Annual 2000** Ben Bernanke, Kenneth Rogoff, 2001 The NBER Macroeconomics Annual presents extends and applies pioneering work in macroeconomics and stimulates work by macroeconomists on important policy issues Each paper in the Annual is followed by comments and discussion Nber Macroeconomics Annual 2000 Ben S. Bernanke, 2001 *IMF Staff Papers, Volume 52, Special Issue, IMF Conference in Honor of Michael Mussa* International Monetary Fund. Research Dept., 2005-08-30 This paper focuses on expectations for the American economy focused on the likelihood of secular stagnation which continued to be debated throughout the post war period Concerns rose during the late 1960s and early 1970s about rapid population growth smothering the potential for economic growth in developing countries were contradicted when during the mid and late 1970s fertility rates began to decline rapidly In policy oriented institutions and in most businesses and individual decision making policymaking decisions are often guided by projections and forward looking indicators The case of Michael Mussa has been one of great anticipation and of great accomplishment and all the early optimistic forecasts about him have turned out to be correct Within the sphere of economics undoubtedly the most famous and widely used forecast one incidentally that thus far has often been incorrect is that based on the Malthusian doctrine of the relationship between resources and population *In Search of Prosperity* Dani Rodrik, 2012-11-21 The economics of growth has come a long way since it regained center stage for economists in the mid 1980s Here for the first time is a series of country studies guided by that research The thirteen essays by leading economists shed light on some of the most important growth puzzles of our time How did China grow so rapidly despite the absence of full fledged private property rights What happened in India after the early 1980s to more than double its growth rate How did Botswana and Mauritius avoid the problems that other countries in sub Saharan Africa succumbed to How did Indonesia manage to grow over three decades despite weak institutions and distorted microeconomic policies and why did it suffer such a collapse after 1997 What emerges from this collective effort is a deeper understanding of the centrality of institutions Economies that have performed well over the long term owe their success not to geography or trade but to institutions that have generated market oriented incentives protected property rights and enabled stability However these narratives warn against a cookie cutter approach to institution building The contributors are Daron Acemoglu Maite Careaga Gregory Clark J Bradford DeLong Georges de Menil William Easterly Ricardo Hausmann Simon Johnson Daniel Kaufmann Massimo Mastruzzi Ian W McLean Lant Pritchett Yingyi Qian James A Robinson Devesh Roy Arvind Subramanian Alan M Taylor Jonathan Temple Barry R Weingast Susan Wolcott and Diego Zavaleta *The Determinants of Currency Crises* B. Rother, 2009-04-17 This book explores the role of political factors in the occurrence of currency crises using an eclectic approach that blends case studies a rigorous theoretical discussion and econometric analysis **International Handbook on the Economics of Education** Geraint Johnes, Jill Johnes, 2007-01-01 is a voluminous and timely collection of 18 essays that addresses a number of core

issues on the economics of education An exhaustive survey of the literature on the role of universities as multi product firms at various levels and disciplines identifies the nature of the economies of scope and scale This enriches the volume further Economic Analysis Policy the endeavour of bringing together very knowledgeable contributors including some of the leading contributors to the literature in the UK and beyond to write a handbook on the economics of education is highly appreciated The Handbook contains 18 substantive chapters encapsulated by a brief introduction and an extensive and a very useful index the Handbook should be praised as a useful overview of the field of economics of education as it stands today Ludger W mann Economic Issues This major Handbook comprehensively surveys the rapidly growing field of the economics of education It is unique in that it comprises original contributions on an exceptional range of topics from a review of human capital signalling and screening models to consideration of issues such as educational externalities and economic growth funding models determinants of educational success the educational production function educational standards and efficiency measurement Labour market issues such as the market for teachers and the transition of students from school to work are also explored The International Handbook on the Economics of Education will be warmly welcomed by academic economists educational researchers and practitioners in educational management as well as policymakers Comprising specially commissioned articles the Handbook will become indispensable reference for this ever topical field of study

**Economic Policy Proposals for Germany and Europe** Ronald Schettkat,Jochem Langkau,2008-03-31 Despite exporting more good and services than any other country in the world economic growth in Germany has been slow through the nineties and the early twenty first century with low wage growth rising unemployment and increasing public deficits German unemployment was traditionally diagnosed as structural neglecting macroeconomic causes of eco Brookings Trade Forum: 2005 Susan M. its effectiveness Dr Isard offers policy perspectives on what countries can do to reduce their vulnerabilities to financial crises and growth failures and a number of general directions for systemic reform The breadth of the agenda provides grounds for optimism that the international financial system can be strengthened considerably without revolutionary change **Rivista di politica economica** ,2004 Southern Economic Journal ,1927 *Winners and Losers Over Two Centuries of Globalization* Jeffrey G. Williamson,2002 The world has seen two globalization booms over the past two centuries and one bust The first global century ended with World War I and the second started at the end of World War II while the years in between were ones of anti global backlash This lecture reports what we know about the winners and losers during the two global centuries including aspects almost always ignored in modern debate how prices of consumption goods on the expenditure side are affected and how the economic position of the poor is influenced It also reports two responses of the winners to the losers complaints Some concessions to the losers took the form of anti global policy manifested by immigration restriction in the high wage countries and trade restriction pretty much everywhere Some concessions to the losers were also manifested by a race towards the top whereby legislation strengthened losers safety nets and increased their sense of political participation The lecture concludes with four lessons of history and an agenda for international economists including more attention to the impact of globalization on commodity price structure the causes of protection the impact of world migration on poverty eradication and the role of political participation in the whole process **Economie Internationale** ,2007 **NBER/Macroeconomics Annual (University of Chicago Press).** ,2007 **Working Paper Series** ,2003 Three Essays on Natural Resource Abundance, Economic Growth and Development Jean-Philippe Christian Stijns,2003 **Policy Research Working Papers** ,1991 *Factors of Convergence* Ülo Ennuste,Lisa Wilder,2001 Accounting for Cross-country Income Differences Francesco Caselli,2004 Why are some countries so much richer than others Development Accounting is a first pass attempt at organizing the answer around two proximate determinants factors of production and efficiency It answers the question how much of the cross country income variance can be attributed to differences in physical and human capital and how much to differences in the efficiency with which capital is used Hence it does for the cross section what growth accounting does in the time series The current consensus is that efficiency is at least as important as capital in explaining income differences I survey the data and the basic methods that lead to this consensus and explore several extensions I argue that some of these extensions may lead to a reconsideration of the evidence **Net Foreign Assets and Imperfect Pass-through** Jorge D.
