**Sustainable Minerals Operations in the Developing World** Geological Society of London, 2005 The sustainable development of minerals which are non renewable resources is a major challenge in today's world In this regard the true definition of sustainability is a debating point in itself can such a concept exist with respect to non renewable resources Perhaps the ideal sustainability model is one that minimizes negative environmental impact and maximizes benefits to society the economy and regional national development Developed and near developed economies rely for commodity supplies on developing countries where major mining operations are often a mainstay of the domestic economy Limited environmental regulation and low wages lead to charges of exploitation Also large numbers of people have no alternative to living by informal often dangerous artisanal mining This Special Publication gives examples from developing countries from all scales of mineral extraction The volume reviews environmental economic health and social problems and highlights the need to solve these before sustainability can be achieved The better solutions require mutual understanding through full involvement of all stakeholders education training and investment so that small scale and artisanal mines can grow into well managed operations At larger scales most major international mining companies have now improved their practices and are monitoring their progress although there is no room for complacency in this rapidly changing area Collaborative Governance in Extractive Industries in Africa Afful-Koomson, Timothy, Owusu Asubonteng, Kwabena, 2015-01-30 The potential for using revenues from extractive resources for inclusive growth in Africa is tremendous However the realisation of the transformative role that extractive industries could play in sustainable development has been elusive in most African countries Extractive industries in most of these countries are plagued with numerous conflicts some with serious casualties over the control distribution management and utilisation of the resources and revenues from extractive operations Collaborative Governance in Extractive Industries in Africa presents the critical challenges facing extractive industries from different contexts countries sectors and settings It features chapters with diverse angle of interest and analytical tools applied in examining the critical issues related particularly to mining and petroleum development in Africa The contributors to this book have extensive academic and professional experience in policy research in the mining oil and gas sectors in Africa and other regions The book addresses the current gap in knowledge about appropriate governance regimes that could create the forum where the divergent interests and positions of various stakeholders of extractive resources and revenues could be handled without any of them resorting to deadly conflicts It presents the functionality of collaborative governance in enhancing for example transparency accountability and equitable distribution of extractive revenues Governance practitioners policy and decision makers could use the structures components and procedures discussed in this book to develop training manuals governance criteria and indicators for measuring and managing collaborative governance regime at the national and local levels They will also find useful information about some of the critical elements that should guide the

strategic implementation of the collaborative process      **Sustainable Mining Practices** Vasudevan Rajaram, Subijoy Dutta, Krishna Parameswaran, 2005-06-30 A perfect introduction to sustainable mining for those new to the subject or those who require some revision this book provides a basic overview of international sustainable mining practices since 1992 with particular emphasis upon practices in the Americas Asia and Europe The text begins by addressing issues such as the volume of waste generated by mining mine closure planning and the environmental impacts and then goes into specific detail in the following areas cleaner production practices in Australia blasting impacts and their control in the US minimizing surface water impacts minimizing groundwater impacts use of environmental indicators in mining and emerging mining technologies that minimize environmental impacts The text contains relevant examples and case histories for ease of revision and also includes a chapter on Best Mining Practices for Sustainable Mining and sub chapters on small scale mining tailings pond management and hazardous waste management      **Mine Planning and Equipment Selection 1995** J. Hadjigeorgiou, A.K. Mehrotra, R. Poulin, R.K. Singhal, 1995-10-31 This text presents about 150 papers based on an international symposium on mine planning and equipment selection held in Canada in 1995 Coverage includes design and planning of surface and underground mines surface mining and the environment tailings disposal and slope stability analysis      **Encyclopaedia of Occupational Health and Safety** Jeanne Mager Stellman, 1998      *Global Gold Production Touching Ground* Boris Verbrugge, Sara Geenen, 2020-05-04 In recent decades gold mining has moved into increasingly remote corners of the globe Aside from the expansion of industrial gold mining many countries have simultaneously witnessed an expansion of labor intensive and predominantly informal artisanal and small scale gold mining Both trends are usually studied in isolation which contributes to a dominant image of a dual gold mining economy Counteracting this dominant view this volume adopts a global perspective and demonstrates that both industrial gold mining and artisanal and small scale gold mining are functionally integrated into a global gold production system It couples an analysis of structural trends in global gold production expansion informalization and technological innovation to twelve country case studies that detail how global gold production becomes embedded in institutional and ecological structures      **Mining and Scientific Press**, 1912

Mehrotra, R.K. Singhal, 2000-01-01 This collection of proceedings from the 6th International Symposium provide a forum for the presentation discussion and debate of state of the art and emerging technology in the field of environmental management      Women Miners in Developing Countries Martha Macintyre, 2017-05-15 Contrary to their masculine portrayal mines have always employed women in valuable and productive roles Yet pit life continues to be represented as a masculine world of work legitimizing men as the only mineworkers and

large mechanized and capitalized operations as the only form of mining Bringing together a range of case studies of women miners from past and present in Asia the Pacific region Latin America and Africa this book makes visible the roles and contributions of women as miners It also highlights the importance of engendering small and informal mining in the developing world as compared to the early European and American mines The book shows that women are engaged in various kinds of mining and illustrates how gender and inequality are constructed and sustained in the mines and also how ethnic identities intersect with those gendered identities Mining and Mineral Prospects in Tanzania R.
