## Minnesotas Endangered Flora Fauna:

**Minnesota's Endangered Flora and Fauna** Barbara Coffin,1988 OC Extinction of species the silent crisis of our time diminishes our world and a commitment to the preservation of species diversity is fundamental to an optimistic view of the future of our own species OCO says Harrison B Tordoff in his forward to this comprehensive reference book MinnesotaOCOs Endangered Flora and Fauna is the result of a legislative mandate the 1981 amendment to the State Endangered Species Act which called upon the stateOCOs Department of Natural Resources and an expert advisory committee to prepare a list of plants and animals in jeopardy Covered in the book are some 300 species ranging from mosses and lichens to jumping spiders and including vascular plants birds mammals reptiles and amphibians fish butterflies mollusks and tiger beetles A chapter is devoted to each of these floral and faunal groups with individual status accounts provided for all species Each account includes the designation endangered threatened or special concern the reasons for that choice and related information on habitat and distribution Endangered and threatened species are illustrated state distribution maps are provided for all species as well as information on national range In their substantial introduction the editors describe the historical background of this project the components of MinnesotaOCOs Endangered Species Program one of the most comprehensive and respected in the nation and the stateOCOs natural environment its diverse landforms and vegetation

*Minnesota's Endangered Flora and Fauna* Barbara Coffin, Lee Pfannmuller,1988 Provides information on status habitat identification and conservation recommendations for endangered species of plants animals and insects     **Orchids of Minnesota** Welby Richmond Smith,1993 Orchids are often thought of as rare fragile objets d art existing only in steamy tropical forests or in the greenhouses of the well to do In fact orchids occur worldwide from the arctic tundra to Tierra del Fuego Minnesota is the home of 43 native species of orchids and Orchids of Minnesota is the only book devoted specifically to their life history and study Orchids occur in every county in Minnesota and in essentially every terrestrial habitat type Both a field guide and an illustrated flora of scholarly quality Orchids of Minnesota includes a section on the biology of orchids morphology ecology and geographical distribution a key to the orchid genera and species and a description of each of the state's 43 species Welby R Smith offers comprehensive descriptions and information on the specific habitat of each species and interesting facts of its natural history In addition the book provides a detailed line drawing and photograph a North American range map and a Minnesota county distribution map for each species Although regional in its focus Orchids of Minnesota will be of interest to both national and international audiences The detailed pen and ink drawings by Vera Ming Wong are beautifully executed and botanically accurate revealing that even the most common orchid species are uncommon when compared to other plants     The Patterned Peatlands of Minnesota Herbert Edgar Wright, Barbara Coffin, Norman E. Aaseng,1992 The first in depth examination of the ecological and political significance of the patterned peatlands of Minnesota one of the largest peatland complexes in the world Research conducted during the past decade has unraveled

many secrets of the intricate peatland ecosystem unique because it has been so little altered by human action and remarkable for its display of the complex adjustment of living organisms to their environment The book describes the flora vegetation and animal life of the different patterned peatlands and considers the role of surface water and ground water in the development and differentiation of fens and raised bogs Specific chapters explore the role of mammals birds and amphibians and reptiles in the peatland ecosystem A rich deposit of knowledge in the form of this book a comprehensive treatment of the largest peatland area in the 48 contiguous United States The editors of The Patterned Peatlands of Minnesota have organized its 19 chapters around five major themes vegetation including development The Patterned Peatlands of Minnesota the culmination of the efforts of all these scientists establishes a benchmark for North American peatland ecology Science For all those who have any kind of interest in peatlands it ought to be very inspiring to have a book like this one which is well illustrated easy to read and has a broad and comprehensive approach to ecology development management and land use of peatlands The knowledge presented is of great interest for scientists all over the world who desire condensed and easily accessible information about these unique peatlands *Journal of Quaternary Science* The Uncommon Ones Lee Pfannmuller,Minnesota.
