Natural History Of Western Trees:

A Natural History of North American Trees Donald Culross Peattie, 2013-10-10 A volume for a lifetime is how The New Yorker described the first of Donald Culross Peattie's two books about American trees published in the 1950s In this one volume edition modern readers are introduced to one of the best nature writers of the last century As we read Peattie's eloquent and entertaining accounts of American trees we catch glimpses of our country's history and past daily life that no textbook could ever illuminate so vividly Here you'll learn about everything from how a species was discovered to the part it played in our country's history Pioneers often stabled an animal in the hollow heart of an old sycamore and the whole family might live there until they could build a log cabin The tuliptree the tallest native hardwood is easier to work than most softwood trees Daniel Boone carved a sixty foot canoe from one tree to carry his family from Kentucky into Spanish territory In the days before the Revolution the British and the colonists waged an undeclared war over New England's white pines which made the best tall masts for fighting ships It's fascinating to learn about the commercial uses of various woods for paper fine furniture fence posts matchsticks house framing airplane wings and dozens of other preplastic uses But we cannot read this book without the occasional lump in our throats The American elm was still alive when Peattie wrote but as we read his account today we can see what caused its demise Audubon's portrait of a pair of loving passenger pigeons in an American beech is considered by many to be his greatest painting It certainly touched the poet in Donald Culross Peattie as he depicted the extinction of the passenger pigeon when the beech forest was destroyed **A Natural History of North American Trees** gives us a picture of life in America from its earliest days to the middle of the last century The information is always interesting though often heartbreaking While Peattie looks for the better side of man's nature he reports sorrowfully on the greed and waste that have doomed so much of America's virgin forest

A Natural History of Western Trees Donald Culross Peattie, 1991 One of two genuine classics of American nature writing now in paperback the other is **A Natural History of Trees of Eastern and Central North America** **A Natural History of Western Trees** Donald Culross Peattie, Donald Wyman, 1966 **A Natural History of Trees of Eastern and Central North America** Donald Culross Peattie, 1991 A detailed handbook giving clear descriptions and full historical information about the trees that grow in North America *Resumé* *A Natural History of Western Trees* Ralph D. Cornell, 1955

Pamphlets on Conservation of Natural Resources, 1909 **Native Trees of the Sierra Nevada** Peter Victor Peterson, 1975 **Sticky Trees** Laurence Holt, 2014-12-16 **Sticky Trees** uses a unique pattern based learning method to bring a timeless skill to anyone with an hour to spare We spent months with readers testing and refining it to be sure it will work for you Includes a comprehensive Next Steps section with guides to the top 10 trees in your state tree field manuals how trees work in six bullet points their five biggest enemies forests parks arboreta and more **Tree Lines** Valerie P Cohen, Michael P. Cohen, 2017-03-20 **Tree Lines** unites striking ink drawings of high altitude pine trees with poetic vignettes about how people interact with mountain

environments The drawings and text work together to form a direct artistic encounter with timberline conifers The husband and wife team of Valerie and Michael Cohen employ a unique process whereby she draws in isolation gives him her drawings and he then writes whatever he is inspired to create Neither offers the other any kind of feedback or instruction The result is an accessible and deeply engaging work that is also extremely well researched the Cohens bring a lifetime of scholarship in literature history and the environment to this work The drawings are black and white pen and ink representations of high alpine ecosystems The prose is stripped bare abbreviated in an epigrammatic style that is poetic and spontaneous Trees represented here are the Western Juniper or Sierra Juniper the Limber and the Bristlecone Pine three species of long lived slow growing conifers that grow across the Great Basin While they represent only a small portion of the vegetative culture high in the western mountains the Cohens use representation as abstraction as is utilized by writers and artists to convey a unique kind of microcosm of our natural environment This book compares to such classics as Leopold's A Sand County Almanac and Berger's Ways of Seeing which open up lines of observation analysis and art for a new generation of readers
