Natural Landscapes of the Niagara Escarpment Richard Kosydar,1996

James Gordon Nelson,Rafal Serafin,2013-06-29 National parks and protected areas offer a wealth of ecological and social contributions or services to humans and life on earth This book describes the strengths of national parks and protected areas in different parts of Europe and North America and the challenges to the full realization of their goals It shows that they are useful not only in conserving rare species and biodiversity but also in protecting water supply and other resources necessary to tourism and to economic and social development generally Ideas and information on useful planning management and decision making arrangements are presented and research needs are identified

Beyond the Global City Gordon

Nelson,2012-05-08 Policies promoting Toronto as a global city and provincial economic engine have been seen as beneficial to the development of all of Ontario yet much of the province has borne significant environmental social economic and political costs as a result of one city s growth Contributors to this volume call for a radical re imagining of public policy at local provincial and federal levels that accounts for Ontario s overlooked regions Beyond the Global City presents a kaleidoscopic view of the province the rich fields and small towns of the southwest the productive agricultural lands of rural Huron County historic Kingston and the Upper St Lawrence the social and cultural diversity of the Ottawa valley the near mythical woodlands and waters of Muskoka and Georgian Bay and the heavily exploited coasts and waters of the Great Lakes to provide a deeper understanding of its various communities In a series of regional studies contributors describe each area s distinctive qualities and challenges and offer recommendations about what is needed to move them forward in a more equitable and sustainable way Two initial historical chapters lay the framework for the regional discussions while cross cutting and integrated chapters analyze the state of natural and cultural heritage and current development theory provincially offering guidance for the future

Planning Canadian Regions Gerald Hodge,Ira M. Robinson,2007-10-01

Planning Canadian Regions is the first book to consolidate the history evolution current practice and future prospects for regional planning in Canada As planners grapple with challenges wrought by globalization the evolution of massive new city regions and the pressures for sustainable and community economic development a deeper understanding of Canada s approaches is invaluable Hodge and Robinson identify the intellectual and conceptual foundations of regional planning and review the history and main modes of regional planning for rural regions economic development regions resource development regions and metropolitan and city regions They draw lessons from Canada s past experience and conclude by proposing a new paradigm addressing the needs of regional planning now and in the future emphasizing regional governance greater inclusiveness and integration of physical planning with planning for economic sustainability and natural ecosystems Planning Canadian Regions will be a much needed text for students and teachers of regional planning and an indispensable reference for planning practitioners It will also find a receptive audience in such disciplines as urban planning environmental

sequel to an earlier volume published in 1997 it tackles the problem of understanding how complex communities interact with landscape and shows how the rules concerning landscape constitute a recognised and readable grammar The mechanisms underlying landscape grammar are both physical and mental being based in part on the mindset of the individual the same landscape can thus evoke different meanings for different people and at different times People's perception has greatly influenced the construction of landscapes over millennia but until recently the potential of this area has been largely untapped Apart from chapters focusing solely upon human interaction with landscape there are several which skilfully integrate artefacts and place with landscape e g Gheorghiu and Sognnes Other chapters look at the way people have marked the landscape through such mechanisms as rock art e g Clegg Devereux Est vez Fossati Kelleher and Skier Rock art establishes personal and communal identity in relation to landscape and it is clear that other forms of visual expression were in place which distinctively created special places within the landscape Landscape constructs can bind cultures together bringing the old ways of reading the landscape into contemporary life e g Smiseth Defining early and late prehistoric landscapes and segregating these into say mundane domestic and ritualised spaces rely on both clear and subtle archaeologies and in this volume distinct monument clustering and ritualised linearity are considered e g Mason and Nash A volume such as this cannot escape the influence of New World approaches such as anthropology and in many respects chapters by Bender Muller and Merritt give context to other chapters within the book Finally one must consider text as a means of constructing landscape and this is considered by Heyd who eloquently deconstructs the travel diary of a 17th century Japanese poet This will be an important volume for archaeologists landscape scholars and students The many approaches used are tried and tested forming an invaluable resource and not just another edited book
