Concerning the Nations Andrew Mein, Else K. Holt, Hyun Chul Paul Kim, 2015-02-26 Isaiah Jeremiah and Ezekiel share much in common. They address the pivotal times and topics associated with the last stages of the monarchical history of Israel and with the development of new forms of communal and religious life through exile and beyond. One important structural component of all three books is a substantial section which concerns itself with a range of foreign nations commonly called the Oracles against the Nations which form the focus of this book. These chapters together present the most up to date scholarship on the oracles, an oft neglected but significant area in the study of the prophetic literature. The particular characteristics of Isaiah, Jeremiah, both Masoretic Text and Septuagint versions and Ezekiel are discussed, showcasing the unique issues pertinent to each book and the diverse methods used to address them. These evident differences aside, the Oracles Against the Nations are employed as a springboard in order to begin the work of tracing similarities between the texts. By focusing on these unique yet common sections, a range of interrelated themes and issues of both content and method become noticeable, for example, though not exhaustively, pattern, structure, language, comparative history, archaeology, sociology, politics, literature, imagery, theme, theology, and hermeneutical issues related to today's context. As a result, this collection presents a range of cutting edge approaches on these key prophetic books and will provide a basis for further comparative study and reflection.

**The Baker Illustrated Guide to Everyday Life in Bible Times** John A. Beck, 2013-09-15 The authors of the Bible routinely employed mention of manners and customs from the ancient world in their inspired writing, fully intending that the Lord would change readers with these images. But modern readers often miss the full literal and figurative meaning of biblical imagery due to the distance in time and experience between the world of today and the world of the Bible. This fully illustrated guide aims to restore clarity and vitality to these portions of God's Word in order to help readers grasp the full meaning of Scripture. For example, the entry on anointing defines the nature of this act and the connotations associated with it, before illustrating how the biblical authors use the act of anointing in their communication with us. Communication that reaches its full maturity in Jesus, the Anointed One. Understanding manners and customs like anointing enriches our experience of reading the Bible and even helps us correctly interpret it. This colorful guide clearly and succinctly introduces modern readers to daily life in Bible times. The cultural practices of the past are fascinating on their own, but even more so as they help us grasp the full meaning of Scripture.

**Near Eastern Seals** Dominique Collon, 1990 A rich source of pictorial information about the Ancient Near East comes to us in the form of miniature reliefs created from the impressions made in clay by tiny engraved stone seals. Originally used for sealing goods and writing tablets, these seals now provide important evidence for administrative practices, technical development, and long distance trade. The designs themselves record religious beliefs, mythical characters, architectural styles, musical instruments, festivals, sport, warfare, transportation, and fashions in dress. In this first comprehensive introduction to pre-Islamic Near

**An Eye for Form** Jo Ann Hackett, Walter E. Aufrecht, 2014-06-06 At the first meeting of his class in Northwest Semitic Epigraphy at Harvard Frank Cross would inform students that one of the things each of them needed was an eye for form By this he meant the ability to recognize typological or evolutionary change in letters and scripts Frank like his teacher William Foxwell Albright was a master of typological method In fact typology was the dominant feature of his epigraphic work from the origins of the alphabet to the development of the scripts of the Dead Sea Scrolls Indeed he has written about the importance of typology itself Because Frank Cross has so dominated the study of the ancient Near East in the last 60 years Aufrecht once asked him what he considered his primary field of study to be Without hesitation he said Epigraphy It seems therefore that the field that he loved and to which he contributed so much is an appropriate subject for this Festschrift in his honor which is being presented by his colleagues friends and former students Included are an appreciation by Peter Machinist and a contribution by the late Pierre Bordreuil **The Cumulative Book Index**, 1991 A world list of books in the English language **Privatization in the Ancient Near East and Classical World** Michael Hudson, Baruch A. Betts, 1997 Seals can be marks of prestige and protection for their owners and the subjects they depict provide information for art historians and genealogists alike Analysis of the stone used can also provide clues to trade routes in operation at particular periods This book brings together the contributions of twelve distinguished speakers at an international seminar held at the British Museum in 1992 the result is a comprehensive study of seals and sealing practices around the world *Identifying Biblical Persons in Hebrew Inscriptions and Two Stelae from Before the Persian Era* Lawrence James Mykytiuk, 1998 **Mesopotamian Furniture** Shamil A. A. Kubba, Sam Kubba, 2006 The aim of this monograph is to define and clarify some of the ambiguities surrounding the development of Mesopotamian furniture from about 10 000 BC to the sack of Nineveh and Babylon Presented as an illustrated documentary and compiled by an architect interior designer and furniture manufacturer with extensive experience in furniture design and woodworking techniques it traces the development of Mesopotamian furniture from its early beginnings and delineates its spheres of influence on contemporary and future societies Most traditional cabinet making techniques in Mesopotamia and Egypt were perfected long before the great Greek and Roman empires and basic joinery has changed little during the past 5000 years While the book is addressed to scholars of antiquity in general and the Mesopotamian archaeologist in particular a minimum of technical language and a large number of hand drawn illustrations are used so that the general reader and serious student will find it equally enjoyable and informative *Ar Or Orientalni ustav* (Ceskoslovenska akademie ved), 2001 Included section Book reviews Akkadica, 1992 *British Museum Magazine*, 1990 Seals and Sealing in the Ancient Near East
