**Classics at Primary School** Evelien

Bracke,2022-12-05 This is the first book to provide a practical toolkit grounded in both current educational practice and pedagogical research on teaching Latin and ancient Greek at primary school with the aim of empowering primary school age children who do not traditionally get access to Classics in education Taking the author s decade of experience in coordinating primary school level Classics projects in the UK and Belgium as a starting point this book investigates how we can move towards educational equity by teaching primary school students Latin or ancient Greek Following an introduction to educational inequity and the role of Classics in this readers encounter four aspects of teaching Classics at primary school

which together improve educational equity widening participation transformative learning translinguaging and community engagement Through reflections on the author's personal experiences practical steps are set out in each chapter to demonstrate how these ancient languages may be taught at primary school in ways that are accessible for every pupil Each chapter ends with a series of reflection questions to help readers consider future practices *Classics at Primary School A Tool for Social Justice* is designed for all those engaged or interested in teaching Latin or ancient Greek at the primary school level Both the practical and theoretical components of this book appeal to teachers as well as researchers and policy makers with a background in education and or Classics

*Forward with Classics* Arlene Holmes-Henderson, Steven Hunt, Mai Musié, 2018-08-09 Despite their removal from England's National Curriculum in 1988 and claims of elitism Latin and Greek are increasingly re-entering the mainstream educational arena Since 2012 there have been more students in state maintained schools in England studying classical subjects than in independent schools and the number of schools offering Classics continues to rise in the state maintained sector The teaching and learning of Latin and Greek is not however confined to the classroom community based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends in universities as part of outreach and even in parks and in prisons This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century The role of classical languages within the English educational policy landscape is examined as new possibilities exist for introducing Latin and Greek into school curricula The state of Classics education internationally is also investigated with case studies presenting the status quo in policy and practice from Australasia North America the rest of Europe and worldwide The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors who conjecture what strategies are conducive to success

**Expanding Classics** Arlene Holmes-Henderson, 2023-04-18 This volume explores innovative ways of expanding classical languages and cultures to educational and museum audiences It shows that classical subjects have an important role to play within society and can enrich individuals' lives in many different and perhaps surprising ways Chapters present projects covering literacy and engagement with reading empowering students to understand and use new types of vocabulary discovering the personal relevance of ancient history and the resonance of ancient material culture and stories Contributors demonstrate that classical subjects can be taught cost effectively and inclusively by non-specialist teachers and in non-traditional settings In their various ways they highlight the need to rethink the role of Classics in twenty-first century classrooms and communities Recommendations are made for further development including ways to improve research policy and practice in the field of Classics education *Expanding Classics* presents an important series of case studies on classical learning of interest to museum educators teacher trainers school leaders and curriculum designers as well as those teaching in primary secondary
