Minnesota In A Century Of Change The State And Its People Since 19:

The Rural Midwest Since World War II J. L. Anderson, 2014-02-01 J L Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence historical issues and cultural touchstones that have informed regional identity in the American South West and Northeast. The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so. Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II. The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored. However the rural landscape has experienced agricultural diversity and major shifts in land use. Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets. The region has also been a place where community leaders fought to improve their economic and social well being. Women redefined their roles on the farm and minorities asserted their own version of the American Dream. The rural Midwest is a regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self depreciation. The essays herein rewrite the narrative of rural decline and crisis and show through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own.

Rethinking Home Joseph A. Amato, 2002-04 Rethinking Home is pioneering scholarship at its best. Amato makes his case for a new local history combining academic sophistication with a deft human touch that can provide a new perspective on the way in which humans have interacted with their natural and created environments over the past 150 years. Amato's eloquent plea for scholars to rethink the intricate relationships between home place nation and world is one that cannot be ignored. Richard O Davies University Foundation Professor University of Nevada Local history is the stepchild of our profession. Joseph Amato has emancipated Cinderella. Innovative and engaging his passion for particulars brings life to people and places whose interest we have underrated far too long and provides a good read beside Eugen Weber Department of History UCLA. In the best Thoreauvian sense Joseph Amato masterfully synthesizes and eloquently presents two decades of practicing and thinking deeply about local history. How pleasantly odd how wonderful that a book on local history should be so rousing so encouraging so redemptive. Rethinking Home is a veritable call to arms for those of us who care deeply about the special the distinctive character of our own home places our own locales Bradley P Dean Thoreau Institute at Walden Woods. **The Session Weekly** Minnesota. engines of change From their origins in the early nineteenth century the Twin Cities helped drive the dispossession of the region s Native American peoples turned their riverfronts into bustling industrial and commercial centers spread streets and homes outward to the horizon and reached well beyond their urban confines setting in motion the environmental transformation of distant hinterlands As these processes unfolded residents inscribed their culture into the landscape complete with all its tensions disagreements contradictions prejudices and social inequalities These stories lie at the heart of Nature s Crossroads The book features an interdisciplinary team of distinguished scholars who aim to open new conversations about the environmental history of the Twin Cities and Greater Minnesota
