Minor League Baseball And Local Economic Development:

Minor League Baseball and Local Economic Development Arthur T. Johnson, 1995 Sport including minor league baseball is an object of public policy. Communities can exploit it to promote economic and social well-being but not without risk. Drawing on case studies of fifteen locales including Fresno, Birmingham, Durham, Buffalo, Indianapolis, and Colorado Springs, Arthur Johnson systematically analyzes the political process by which communities decide to invest in stadiums for minor league baseball teams. He explores such factors as the presence or absence of a development strategy as a guide in decision making and the value to a community of a minor league team and its stadium. Johnson also describes the dynamics of minor league baseball franchise relocation, the importance of intergovernmental relations to stadium financing and the organization and business of minor league baseball including its formal relationship with major league baseball.

It presents cutting edge case studies from around the world including from the United States, China, Europe, the Middle East, South America, and Africa. It considers some of the most interesting emerging themes and topics in contemporary sport business including fitness marketing, the role of sustainability in sport marketing, social media and digital marketing, athlete brand relationships, and the promotion and development of collegiate and scholastic sport. As a whole this volume presents a snapshot of the opportunities and challenges facing sport marketers around the world. *Sport Marketing in a Global Environment* is a fascinating reading for any advanced student, researcher, or professional working in sport business and management, sport development, marketing, strategic management, or global business.

The Economics and Politics of Sports Facilities Wilbur C. Rich, 2000-05-30 Rich and his contributing authors provide a political and economic analysis of sports stadium construction in the United States, the impact it has on the sports industry itself and on the host communities in which stadiums and arenas are built. The book brings together the research of leading academic analysts of sports in American society and gives a candid assessment.

of the claims and benefits the sports industry makes in its continuing promotion of new stadium construction. Focusing on Baltimore, Cleveland, Chicago, Boston, Detroit, New Orleans, Toledo, and Phoenix, the authors examine the topic from the perspectives of history, politics, and economics, and in doing so they raise several questions about taxpayer and community protection issues. Specifically, what do communities really get out of these facilities? They point out that even as new and more expensive facilities are being built, Congress has not provided taxpayers and cities any real protection from the risks involved in stadium investment. Rich and his contributors examine how the pro-stadium coalitions mobilize and explain why stadium supporters manage to win most of their construction initiatives. In doing so, the contributors challenge the conventional wisdom that stadiums stimulate economic development and provide good jobs. On the contrary, they have not lived up to the promises owners made to their host communities. Neither have they generated high paying jobs nor have they met their operating costs. The book concludes with ways in which sports franchise owners can be held more accountable to their communities. The result is a powerful, well-reasoned, skeptical but fair assessment of a growing phenomenon and an important resource for professionals and academics in all fields of public policy administration and urban development and management.

Baseball and American Culture, 1995. More than any other sport, baseball has become a ubiquitous part of popular culture in the United States. Even nonfans can be heard using the game's terminology to describe everyday situations. Writings on the sport reflect the nature of society from sobering statistical studies to business analyses from acclaimed novels on the sport to poetry about the game. The 4,500 works here are arranged by 25 broad categories such as art, commercialization, drug use and abuse, ethnic diversity, heroic images, humor, innovation and change, songs, American values, and women in baseball. Compiled from a wide range of magazines, journals, newspapers, and books, the work gives full bibliographic information for each entry. Comprehensive author and subject indexes are provided for further ease of use.

Euchner, 1994-09-01. Details how owners have shamelessly played cities against one another to get sweetheart deals for their stadiums. Sports Illustrated Can a sports franchise blackmail a city into getting what it wants: a new stadium, say, or favorable leasing terms, by threatening to relocate? In 1982, the owners of the Chicago White Sox pledged to keep the team in Chicago if the city approved a 5 million tax-exempt bond to finance construction of luxury suites at Comiskey Park. The city council approved it. A few years later, when Comiskey Park was in need of renovation, the owners threatened to move the team to Florida unless a new stadium was built. A site was chosen near the old stadium; property condemned; residents evicted; and a new stadium built. We had to make threats, the owners said. If we didn't have the threat of moving, we wouldn't have gotten the deal. Sports is not a dominant industry in any

sports building boom Professional sports teams are demanding and receiving fancy new playing facilities that are heavily subsidized by government In many cases the rationale given for these subsidies is that attracting or retaining a professional sports franchise even a minor league baseball team or a major league pre season training facility more than pays for itself in increased tax revenues local economic development and job creation But are these claims true To assess the case for subsidies this book examines the economic impact of new stadiums and the presence of a sports franchise on the local economy It first explores such general issues as the appropriate method for measuring economic benefits and costs the source of the bargaining power of teams in obtaining subsidies from local government the local politics of attracting and retaining teams the relationship between sports and local employment and the importance of stadium design in influencing the economic impact of a facility The second part of the book contains case studies of major league sports facilities in Baltimore Chicago Cincinnati Cleveland Indianapolis San Francisco and the Twin Cities and of minor league stadiums and spring training facilities in baseball The primary conclusions are first sports teams and facilities are not a source of local economic growth and employment second the magnitude of the net subsidy exceeds the financial benefit of a new stadium to a team and third the most plausible reasons that cities are willing to subsidize sports teams are the intense popularity of sports among a substantial proportion of voters and businesses and the leverage that teams enjoy from the monopoly position of professional sports leagues
