Miracle And A Privilege Recounting A Half Century Of Surgical Advance:

A Miracle and a Privilege Francis D. Moore, M.D., 1995-05-17 Francis Moore entered Harvard Medical School in September of 1935 seven years before penicillin became available During his remarkable career in surgery research and education Moore has witnessed and contributed to some of the most important biomedical advances of the century and his students now practice surgery worldwide In this autobiography he brings humor and warmth to the story of a lifetime at the forefront of medicine In this fascinating book Moore describes his work in radioactive isotope research burn therapy breast cancer treatment transplant science and understanding the process of convalescence Moore s colleagues have included such medical pioneers as George Thorn David Hume Thomas Starzl John Gibbon Steven Rosenberg Harold Urey and Nobel Prize winner Joseph Murray and he recounts the setbacks and victories of their work For example he writes of the adventure he had with Charles Hufnagel in which 25 dogs implanted with Hufnagel s experimental heart valves made their escape into the Connecticut countryside and had to be recovered by dog control officers wielding stethoscopes Yet Moore recalls with equal clarity the young mother who gave him a silver dollar for delivering her baby the husband who begged that his ailing wife be allowed to die with dignity and the desperately sick patients who made themselves available for experimental surgery and treatment In one of his early operations he relieved the pain anguish and threat to a wonderful small boy by removing the boy s diseased appendix He describes this capability as a miracle and a privilege The book includes a gripping account of the aftermath of the Cocoanut Grove nightclub fire in Boston in 1942 when Moore learned the horrific details of death by fire He recounts both his experience with M A S H units and battalion aid stations in Korea and the sudden request from the U S State Department that resulted in his treating King Ibn Saud of Saudi Arabia Moore s life story reflects his serious commitment to human well being as well as his appreciation for the wonder of human life Physicians medical students and all readers alike will find this book informative and inspirational Francis Daniels Moore M D is Moseley Professor of Surgery Emeritus Harvard Medical School and Surgeon in Chief Emeritus Peter Bent Brigham Hospital Boston

A Miracle and a Privilege Moore, Francis Daniels Moore, **Miracle and a Privilege** Francis D. Moore, 2002 **In Her Lifetime**

Committee to Study Female Morbidity and Mortality in Sub-Saharan Africa, Institute of Medicine, 1996-03-20 The relative lack of information on determinants of disease disability and death at major stages of a woman s lifespan and the excess morbidity and premature mortality that this engenders has important adverse social and economic ramifications not only for Sub Saharan Africa but also for other regions of the world as well Women bear much of the weight of world production in both traditional and modern industries In Sub Saharan Africa for example women contribute approximately 60 to 80 percent of agricultural labor Worldwide it is estimated that women are the sole supporters in 18 to 30 percent of all families and that their financial contribution in the remainder of families is substantial and often crucial This book provides a solid documentary base that can be used to develop an agenda to guide research and health policy formulation on female health

both for Sub Saharan Africa and for other regions of the developing world This book could also help facilitate ongoing collaboration between African researchers on women s health and their U S colleagues Chapters cover such topics as demographics nutritional status obstetric morbidity and mortality mental health problems and sexually transmitted diseases including HIV New and Forthcoming Books National Academy Press (U.S.),1993 Liberty, Equality, and Plurality Larry May,Christine T. Sistare,Jonathan Schonsheck,1997 Voters as well as ethicists and legal experts are currently debating many of the issues inherent in balancing individual with majority and minority group rights though often there seems to be an inverse correlation between the two May Washington U chairs lively multidisciplinary discussions on the in compatibility of liberty and equality with responsibility being the wild card law morality and limits on liberty in regard to freedom of speech poverty taxation and assisted suicide and equality and the clash of cultures in cases of hate speech and religious freedom vs refusal of medical treatment Annotation copyrighted by Book News Inc Portland OR **Annals of the Royal College of Surgeons of England** Royal College of Surgeons of England,1996 *Bulletin of the American College of Surgeons* American College of Surgeons,1998 Includes the college s Hospital standardization report **The American Urological Association Centennial History 1902-2002** ,2002 Final Report of the Advisory Committee on Human Radiation Experiments United States. Advisory Committee on Human Radiation Experiments,1996 This book describes in fascinating detail a variety of experiments sponsored by the U S government in which people were exposed to radiation without their knowledge After reviewing hundreds of thousands of documents from the Atomic Energy Commission and other agencies the Advisory Committee appointed by President Clinton in January 1994 found that nearly 4 000 human radiation experiments most involving very low doses of radioactive tracers were sponsored by the federal government between 1944 1974 This book documents these findings to provide a fascinating if not disturbing reminder of both the shocking standards for human experimentation and the practice of government secrecy in recent history Carried out at the height of the Cold War experiments included feeding radioactive cereal to teenagers at a school for the mentally retarded irradiating the testicles of prison inmates injecting plutonium into hospital patients and intentional releases of radiation into the environment The book places these experiments within their historical context and a review of the relevant government policies and ethics standards at the time is included The analysis is then applied to contemporary research on human subjects The book concludes with a discussion of the Committee s key findings and a set of recommendations for changes in institutional review boards the interpretation of ethics rules and policies the conduct of research involving military personnel the oversight and accountability for ethical violations compensation for research injuries and balancing national securities interests with the rights of the public This compelling volume will prove to be a landmark in the development of standards for human experimentation Ethicists public health professionals and those interested in the history of medicine and Cold War history will be intrigued by the findings in this volume Publisher description LoC Chicago Medicine ,1995 *The American*
