**for Arthritis** Robert G. Smith, Ph.D.,Todd Penberthy,2015-01-01 The general explanation for the cause of arthritis is that over time our joints simply wear out that is the cartilage that lubricates the ends of the bones simply gets worn thinner and thinner until one bone wars directly on another causing pain and lowering our quality of life It stands to reason that wear and tear is responsible for some of the damage It is considered a progressive disease meaning that once the symptoms are diagnosed they tend to get worse Yet arthritis can be reversed The process of degradation and regrowth in a joint is a dynamic process that continues throughout life Arthritis results when the joint does not recover from damage Most people may not realise it but they have a direct influence on the current and future health of their joints through their nutritional behaviour With the proper knowledge we can prevent degeneration from taking hold by improving our body s regeneration processes This book offers natural weapons we can use to defend and protect our joints from the destructive effects of poor nutrition and time This clear readable book describes the composition of joints and how they work within the body how normal healthy joints are supported and what can go wrong It describes the degenerative diseases that affect joints and explains thebasis of orthomolecular natural megavitamin medicine from a scientific perspective There are several types of

arthritis but they all involve degeneration of the joints and tissues surrounding them This book covers the different types Including Osteoarthritis OA Rheumatoid arthritis RA Gout Arthritis caused by infections or inflammation such as Borreliosis Lyme Disease fibromyalgia and psoriasis And more THE VITAMIN CURE FOR ARTHRITIS explains each form of arthritis and current and new medical treatments for them More importantly it describes the nutritional approach to help sufferers prevent further progress of the disease and even reverse it

Frank Lipman, 2016-02-23 Are you tired of feeling worn out sick and overweight Why is it that we experience weight gain fatigue aches and pains illnesses and memory loss as we get older And more importantly do we have to These ailments do become more common in our 30s and 40s but they are by no means inevitable In fact we are perfectly capable of remaining slim and vigorous and our brains can absolutely stay clear and sharp if we give them what they need The problem is that

most of us don't do that. We don't realize what our bodies need so we eat the wrong foods, skimp on sleep and deprive our bodies of the movement they crave. Overwhelmed by the stresses and the pressures of our lives we take a host of prescriptions never realizing how they might be disrupting our body's innate ability to heal. Most insidious of all many of us lack the personal support and the community that we need to feel fully alive. Instead we buy into the myth that age means decline. A pioneer and internationally recognized expert in integrative and functional medicine Dr Frank Lipman proves that you don't have to feel this way. You have a choice. In his latest book Dr Lipman breaks through the common myths and misconceptions surrounding aging and dieting and he zeroes in on what you need to do in order to feel your very best.
