table only to be revived to tell of bright lights and the pathway to the afterlife we've all heard of what seem miraculous events. They have surfaced across history. They range from stigmata and bleeding icons to deadly tumors that disappear and healers who succeed just by laying hands on the afflicted from people who can predict unexpected events to so-called mediums and those who can allegedly see and speak with the dead. Some miracles are intricately tied to religious beliefs but there are millions of people who ascribe to no particular religion yet still believe that things happen that defy all laws of nature and thus defy scientific explanation. In these books, eminent scholar J. Harold Ellens and his team of expert contributors examine miracles of body, mind, and spirit, presenting the most recent research and writing on these uncommon events as they aim to bring hard science to some of the most persistent and peculiar phenomena associated with the human race.
