James Birx, 2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories Family Functioning John J. Schwab, Helen Gray-Ice, Florence R. Prentice, 2006-04-18 The family that most fundamental of human groups is currently perceived to be changing in response to social biological cultural and technological developments in our postmodern society While the observed changes in families have been considered by some sociologists to be evidence of adaptation and therefore normal the authors of this volume consider them maladaptive Viewing society from the point of view of clinical psychiatry they point to greatly increased numbers of children born to single mothers soaring rates of divorce a statistically confirmed increase in mental disorders increase in reported incest high rates of depression in younger people and escalation of the amount of reported family violence as evidence that the family as a social institution is in crisis and can either move toward renewed vitality or continued deterioration Perceiving a need to obtain information about family functioning that might lead to the increased stability and well being of this critically important type of system Dr John Schwab and his associates designed and carried out a research program that began with a thorough review of relevant literature beginning with LePlay s study of 300 families in the 1850 s and including important recent statistical studies They found that although these studies represent advances in understanding the family system some serious problems with the research remain one of which is confounding variables such as family function and mental or substance abuse disorders so that if a family member has a problem such as drug abuse the family is classified as dysfunctional *Classic Anthropology* John William Bennett, *Classic Anthropology* is Bennett s label for the work produced by anthropologists during the period 1915-1955 which many believe represents the most productive era in the discipline s history It is also one that can never be

repeated given the fact that most of anthropology's basic data the ideas and customs of tribal peoples have been extinguished or greatly transformed by modernization and nationalization The book is composed of some fifteen essays Among the issues examined are the emergence of a functionalist viewpoint in ethnology the difficulties of developing a theory of human behavior because of the focus on culture the search for concepts of culture to serve specialized needs the neglect of social psychology by the culture and personality field how value judgments emerged willy nilly or conversely were neglected in ethnological research how applied anthropology was challenged by Action Anthropology and how the interdisciplinary anthropology of the late 1940s was submerged in the postwar effort to return the discipline to traditional roots Individual anthropologists whose work is examined include among others Bronislaw Malinowski Leslie Spier Alfred Kroeber Ralph Linton Margaret Mead Ruth Benedict Clyde Kluckhohn Gregory Bateson and Walter Taylor *Culture. A Philosophical Perspective* Martine Lejeune, 2016-12-12 This book attempts to grant a clear insight into the problem of culture Thinking about culture we are faced with the inevitable and apparently insuperable problem of how to study culture in the absence of a consensual definition of this notion For several reasons the anthropologists Claude Lévi Strauss and Clifford Geertz provide an ideal starting point for tackling this issue Firstly both graduated in philosophy before turning to anthropology Secondly the linguistic model based approach they initiated is founded on the general belief that language is a feature which all men have in common And thirdly when taken together the conclusions reached by Lévi Strauss and Geertz which contradict one another yield a clear view on the conceptual complexity of culture **Ancient Peoples of the Great Basin and Colorado Plateau** Steven R Simms, 2016-07 Written to appeal to professional archaeologists students and the interested public alike this book is a long overdue introduction to the ancient peoples of the Great Basin and northern Colorado Plateau Through detailed syntheses the reader is drawn into the story of the habitation of the Great Basin from the entry of the first Native Americans through the arrival of Europeans Ancient Peoples is a major contribution to Great Basin archaeology and anthropology as well as the general study of foraging societies **Classical Approaches to the Study of Religion** Jean Jacques Waardenburg, 1974 **Intercultural Public Relations** Lan Ni, Qi Wang, Bey-Ling Sha, 2018-06-12 Intercultural Public Relations Theories for Managing Relationships and Conflicts with Strategic Publics develops a coherent framework to unify the theories of public relations and intercultural communication and within the framework examines empirical studies of intercultural interactions This book follows an intercultural approach which considers how individuals and entities with dissimilar cultural identities interact and negotiate to solve problems and reach mutually satisfying outcomes This work provides a theory driven empirically supported framework that will inform and guide the research and practices of intercultural public relations Furthermore it provides numerous levels of analysis and incorporates the use and challenges of social media The book examines theories and issues in three integrated processes Identification of publics Relationship management Conflict resolution These areas represent the most critical functions that public relations

contributes to organizational effectiveness scanning the environment identifying strategic publics and building long term
 quality relationships with these publics to reduce costs gain support and empower the publics themselves In doing so the
