Higher Education Center for Alcohol, Drug Abuse, and Violence Prevention (ED).,2011 Currently all 50 states limit alcohol purchases to people aged 21 and over But that hasn't always been the case In fact it was July 17 1984 when President Ronald Reagan signed the national 21 minimum legal drinking age MLDA legislation into law At that time only 23 states had minimum alcohol purchasing ages of 21 years old The legislation called for withholding federal highway funds from the remaining 27 states if they did not follow suit By 1988 all states had set 21 as the MLDA MLDA 21 laws have many components that target outlets that sell alcohol to minors adults who provide alcoholic beverages to minors and minors who purchase or attempt to purchase possess or consume alcohol In addition there are companion laws that provide for lower blood alcohol concentration BAC limits for underage drivers and other legislation such as laws that require registration of beer keg purchases and make hosts liable for the actions of underage drinking guests Contains 3 resources **Minimum**

Government Accountability Office (,2013-06 In response to a congressional request GAO 1 examined empirical research regarding the effect that changes in the legal drinking age have had on traffic accidents alcohol consumption driving after drinking and related concerns for youth younger than the minimum drinking age and 2 determined the extent to which these evaluations provide empirical support for federal and state policy initiatives Congress passed legislation in 1984 requiring states to either raise the minimum drinking age to 21 years by September 30 1986 or risk federal withholding of some federal aid highway funds By October 1986 eight states and Puerto Rico had not complied with the legislation GAO found that studies on the law show that raising the minimum drinking age has 1 had a significant effect on reducing alcohol related traffic accidents for the age group affected by the law and 2 reduced the consumption of alcohol and the incidence of driving after drinking GAO also found limited or insufficient evidence to assess 1 the effect that the increase in the legal drinking age has had on the involvement of 16 and 17 year old drivers in alcohol related accidents 2 the extent that youth cross state lines to legally obtain alcoholic beverages and 3 the long term effects of the law **National Minimum Drinking Age Law** United States. Alcohol policies have potentially far reaching impacts on risky sexual behavior prenatal health behaviors and subsequent outcomes for infants We examine whether changes in minimum drinking age MLDA laws affect the likelihood of poor birth outcomes Using data from the National Vital Statistics NVS for the years 1978 88 we find that a drinking age of 18 is associated with adverse outcomes among births to young mothers including higher incidences of low birth weight and premature birth but not congenital malformations The effects are largest among black women We find suggestive evidence from both the NVS and the 1979 National Longitudinal Study of Youth NLSY that the MLDA laws alter the composition of births that occur In states with lenient drinking laws young black mothers are more likely to have used alcohol 12 months prior to the birth of their child and less likely to report paternal information on the birth certificate We suspect that lenient drinking laws generate poor birth outcomes because they increase the number of unplanned pregnancies National Bureau of Economic Research web site **Calculating Lives Saved Due to Minimum Drinking Age Laws** John Kindelberger,2005
