**Mining Frontiers of the Far West, 1848-1880** Rodman Wilson Paul,2001 Long out of print this study of western mining is now available with three new chapters by Elliott West When originally published in 1963 Professor Paul's book offered the first comprehensive view of western mining as an integral part of the settlement process In his supplemental chapters Professor West presents a social history of mining camps encompassing discussions of gender class race labor and the environment The combined scholarship of Paul and West makes a strong case for the transforming effects of the mining frontier on western society in particular and American society in general This revised expanded edition continues to offer a distinctively vivid voice and an unusually keen eye for telling detail **BOOK JACKET** Title Summary field provided by Blackwell North America Inc All Rights Reserved    **The Mining West** Richard E. Encyclopedia of Women in the American West chronicles the work of Native American activists such as Mildred Imach Cleghorn and Sarah Winnemucca the champion of rights of indigenous peoples who established Nevada's first school for Native Americans in 1884. The encyclopedia also explores the stories of early ranchers. Among them is Freda Ehmann who founded the California Ripe Olive Association where according to her grandson science and chemical exactness failed the experience and care of a skillful and conscientious housewife succeeded. Women in the American West have long thrived in the arts. This is evidenced by the work of authors such as Pulitzer Prize winner Willa Cather, Amy Tan and Linda Hasselstrom, poets such as Hildegarde Flanner and journalist Molly Ivins. All are profiled in this comprehensive work. The arts are used to address both aesthetic and serious societal issues such as Maxine Hong Kingston's *The Woman Warrior*, the story of a woman's struggle with identity as a minority in American culture. Academics will appreciate a study of Ruth Underhill's *Autobiography of a Papago Woman* which deals with the role of feminist ideology in changing the discipline of anthropology during the first part of the twentieth century. Women in the American West have also achieved many firsts such as Utah's Ivy Baker Priest, the first woman to hold the office of Treasurer of the United States and Georgia Bullock, the first woman judge in the State of California. *The Many Roles of Women in the American West* The Encyclopedia of Women in the American West covers nine diverse topical categories: Agriculture, Ranching, Arts and Letters, Education, Entrepreneurs, Law, Pioneers, Public Performance, Religion, Women's organizations. The West is often portrayed as a rough and tumble man's world but behind these men and often independently were women with the dreams, strength and determination to make a difference. The Encyclopedia of Women in the American West is a tribute to their independence, intelligence, courage, spirit, perseverance and daring. Key Features: Authoritative and in-depth articles on a wide range of salient issues in women's history. Suggested readings and interpretive materials for every entry. Bridges two perennially popular areas of academic and lay interest—the American West and women's history. Developed and priced to appeal to high school and public libraries as well as academic libraries. Recommended Libraries: Public, school, academic, special and private, corporate.

**The Mining World Index of Current Literature**, 1914    **Wounding the West** David Stiller, 2000-01-01. Federal policy toward hardrock mining remains largely unchanged since the passage of the General Mining Law of 1872. That legislation was originally intended to promote settlement and economic development of the American West. A century and a quarter later the region no longer requires congressional coddling yet more than half a million mines and mill sites remain abandoned throughout the western states. These sites have created 180 000 acres of polluted lakes and reservoirs and 12 000 miles of contaminated streams and rivers. Montana's Blackfoot River made famous by Norman Maclean's *A River Runs Through It* is one such battered body of water. Not only did the 1872 law essentially give the land and minerals to miners and mining companies and it continues to do so today the law also required no mine reclamation or water quality protection. State mining laws likewise required little or no reclamation. *Wounding the West* traces the role of hardrock mining and its relationship with the American West by

following the environmental history of one Montana mine the Mike Horse from its 1898 discovery through its heyday in the 1940s subsequent abandonment and eventual cleanup under the coercion of a state law that many would consider ill suited for abandoned mines David Stiller argues that taxpayers should treat mining companies like the for profit enterprises they are and insist that the hardrock mining industry pay a fair royalty for extracted minerals and then put this funding to work correcting the industry s worst historical abuses    **Minerals Yearbook** ,2012    **San Juan Bonanza** John L.
