**Mirror, sword and jewel** Kurt Singer,1973    *Forging a Singaporean Statehood: 1965-1995* Robin

Ramcharan,2021-10-25 This work takes an in depth look at the multi faceted contemporary relationship between Singapore and Japan since the end of World War II It is the story of a relationship between an economic superpower Japan and an enterprising city state whose leaders have sought to emulate not only Japan's economic success but several key facets of Japanese society as well No other country surpasses Singapore in its public admiration of Japan How is it possible for a multi ethnic Singapore to emulate a relatively homogeneous Japan What features of economic and political motives behind the attempt to emulate Japan These and other questions are addressed in this work which will be of interest to scholars of the international relations and security of East and Southeast Asia    Learner Narratives of Translingual Identities Patrick Kiernan,2018-08-16 This book addresses translingual identities through an innovative multimodal analysis of the language learning histories of a class of advanced learners of English in Japan who grew up between two or more languages The author explores both the translingual experiences of those in the classroom and how they use language and gesture when describing their experiences to each other This approach uses three perspectives it looks at the worlds and identities the interviewees construct for themselves at their interpersonal communication and at the way they frame their experience Finally it offers some lessons based on the observations of the class which reveal the values they share and the key to their success as language learners It will appeal to applied linguistic and educational researchers particularly those with an interest in narrative approaches to exploring educational contexts as well as language educators and policy makers interested in gaining a learner perspective on language learning    日本の歴史と文化 1986    Japanese History & Culture from Ancient to Modern Times John W. Criminologists have despaired that modernization and crime are inseparable The more modern we become the more criminal Japan has long been seen as an exception to the rule The reasons for this however have not been well understood In this book the independent value of culture is explored to reveal new insights The author finds that while it remains the case that crime reduction may come at some cost to individual autonomy the West can learn from Japan to reduce the social harm of too much freedom Instead of endless crime prevention programs through social engineering policy makers could pay more attention to sociological insights concerning responsibility obligations and collective identities    **The Journal of Asian Studies** ,1974    Public Administration Series--Bibliography ,1989    Newsletter United States.
