**American Misfits and the Making of Middle-Class Respectability** Robert Wuthnow, 2020-08-04 How American respectability has been built by maligning those who don't make the grade How did Americans come to think of themselves as respectable members of the middle class Was it just by earning a decent living Or did it require something more And if it did what can we learn that may still apply The quest for middle class respectability in nineteenth century America is usually described as a process of inculcating positive values such as honesty hard work independence and cultural refinement But clergy educators and community leaders also defined respectability negatively by maligning individuals and groups misfits who deviated from accepted norms Robert Wuthnow argues that respectability is constructed by othering people who do not fit into easily recognizable socially approved categories He demonstrates this through an in depth examination of a wide variety of individuals and groups that became objects of derision We meet a disabled Civil War veteran who worked as a huckster on the edges of the frontier the wife of a lunatic who raised her family

while her husband was institutionalized an immigrant religious community accused of sedition and a wealthy scion charged with profiteering Unlike respected Americans who marched confidently toward worldly and heavenly success such misfits were usually ignored in paeans about the nation But they played an important part in the cultural work that made America and their story is essential for understanding the othering that remains so much a part of American culture and politics today
