## New Immigrants:

**The New Immigration** CAROLA SUAREZ-OROZCO,Marcelo Suarez-Orozco,Desiree Baolian Qin-Hilliard,2012-11-12 At the turn of the millennium the United States has the largest number of immigrants in its history As a consequence immigration has emerged once again as a subject of scholarly inquiry and policy debate This volume brings together the dominant conceptual and theoretical work on the New Immigration from such disparate disciplines as anthropology demography psychology and sociology Immigration today is a global and transnational phenomenon that affects every region of the world with unprecedented force Although this volume is devoted to scholarly work on the new immigration in the U S setting any of the broader conceptual issues covered here also apply to other post industrial countries such as France Germany and Japan *Achieving Anew* Michael J. White,Jennifer E. Glick,2009-04-09 Can the recent influx of immigrants successfully enter the mainstream of American life or will many of them fail to thrive and become part of a permanent underclass Achieving Anew examines immigrant life in school at work and in communities and demonstrates that recent immigrants and their children do make substantial progress over time both within and between generations From policymakers to private citizens our national conversation on immigration has consistently questioned the country s ability to absorb increasing numbers of foreign nationals now nearly one million legal entrants per year Using census data longitudinal education surveys and other data Michael White and Jennifer Glick place their study of new immigrant achievement within a context of recent developments in assimilation theory and policies regulating who gets in and what happens to them upon arrival They find that immigrant status itself is not an important predictor of educational achievement First generation immigrants arrive in the United States with less education than native born Americans but by the second and third generation the children of immigrants are just as successful in school as native born students with equivalent social and economic background As with prior studies the effects of socioeconomic background and family structure show through strongly On education attainment race and ethnicity have a strong impact on achievement initially but less over time Looking at the labor force White and Glick find no evidence to confirm the often voiced worry that recent immigrants and their children are falling behind earlier arrivals On the contrary immigrants of more recent vintage tend to catch up to the occupational status of natives more quickly than in the past Family background educational preparation and race ethnicity all play a role in labor market success just as they do for the native born but the offspring of immigrants suffer no disadvantage due to their immigrant origins New immigrants continue to live in segregated neighborhoods though with less prevalence than native black white segregation Immigrants who arrived in the 1960s are now much less segregated than recent arrivals Indeed the authors find that residential segregation declines both within and across generations Yet black and Mexican immigrants are more segregated from whites than other groups showing that race and economic status still remain powerful influences on where immigrants live Although the picture is mixed and the continuing significance of racial factors remains a

concern Achieving Anew provides compelling reassurance that the recent wave of immigrants is making impressive progress in joining the American mainstream The process of assimilation is not broken the advent of a new underclass is not imminent and the efforts to argue for the restriction of immigration based on these fears are largely mistaken *New Immigrants, Changing Communities* Elżbieta M. migrants have stronger settlement and family oriented tendencies compared to labor migrants Reinventing the Melting Pot Tamar Jacoby,2009-04-28 Nothing happening in America today will do more to affect our children s future than the wave of new immigrants flooding into the country mostly from the developing world Already one in ten Americans is foreign born and if one counts their children one fifth of the population can be considered immigrants Will these newcomers make it in the U S Or will today s realities from identity politics to cheap and easy international air travel mean that the age old American tradition of absorption and assimilation no longer applies Reinventing the Melting Pot is a conversation among two dozen of the thinkers who have looked longest and hardest at the issue of how immigrants assimilate scholars journalists and fiction writers on both the left and the right The contributors consider virtually every aspect of the issue and conclude that of course assimilation can and must work again but for that to happen we must find new ways to think and talk about it Contributors to Reinventing the Melting Pot include Michael Barone Stanley Crouch Herbert Gans Nathan Glazer Michael Lind Orlando
