Models of Religious Education

Harold W. Burgess, 1996-01-01

Contemporary Challenges for Religious and Spiritual Education Arniika Kuusisto, Terry Lovat, 2017-10-02 From being on the margins of scholarly debate for much of the past century and a half religion is being recognized once again as an area of concern for scholars politicians and public policy makers and thus the role of religious and spiritual education has taken on a new importance Apart from its socio political ramifications the place of religiousness and spirituality in the make up of individuals has been given renewed prominence through updated brain science and neuroscientists regularly refer to elements of this brain science in terms such as spiritual intelligence and even mystical consciousness This book explores many of the new directions being taken in the field of religious and spiritual education as new developments challenge the priorities of formal education and open up new avenues for incorporating religion and spirituality into the modern curriculum It asks whether the educational aims of teachers should be focused on specifically personal development or whether religious education should be used to develop understanding of more global and social issues such as citizenship conflict and ethics The book also addresses neuroscientific insights which suggest a need to engage with cognition and emotion in order to create a rich learning environment something to which a particularly contested subject area like religion and spirituality is well placed to contribute This book was originally published as a

special issue of the Journal of Beliefs Values **Religions, Rights and Laws** Anthony Bradney, 1993 The central concern of this book is the interaction between the idea of religious freedom and the regulation of a modern state by laws Hence it primarily addresses the structure of and reasons for the legal order rather than describing legal rules It is a book about law rather than a mere law book The author begins by examining the nature of religion the differences between religious and secular philosophies and existing notions of rights In Part 2 he illustrates the relationship between legal rules and religion by means of case studies the laws applying the conscientious objection to trade union membership religious education in schools Sunday trading religious slaughter charities and blasphemy Part 3 ponders the links between freedom of belief and freedom of practice discusses the idea of legislation against religious discrimination and concludes with a discussion of the prospects for religious freedom under the law Although practising and academic lawyers will obviously find this book useful it will also be valued by students and teachers of religious studies sociologists and philosophers Education and Society , 1984

Handbook of Young Adult Religious Education Harley Atkinson, 1995 Handbook of Young Adult Religious Education is an all inclusive and thorough volume It deliberately integrates research theory and practice so that religious educators of young adults can be optimally successful *Common Faith* Kevin Mott-Thornton, 1998 The notion of spiritual development has been part of the legislative framework of education in England and Wales since 1944 Its use in the legislation implies the belief that there is an important dimension of state education connected with but extended beyond personal development and the promotion of values This book is an exercise in the practical philosophy of education and consequently explores certain ideas and policy ideals throwing light on the logical relations between them
