New Evolutionary Timetable Steven M. Stanley, 1981-12-03 In the Beginning-- Nathan Aviezer, 1990 **Evolution, Creationism, and Other Modern Myths** Vine Deloria, Jr., 2016-12-01 Using the tension between evolutionists and creationists in Kansas in the late 1990s as a focal point Deloria takes Western science and religion to task providing a critical assessment of the flaws and anomalies in each side's arguments **Gnosticism Through the Prism of the Third Millennium** Alexander Maistrovoy, 2018-04-27 In the epoch of the late antiquity Gnostic schools gave their own exhaustive answers for the eternal questions of humankind Who are we Where did we come from and why do we exist What gives rise to endless and inescapable evil and suffering Jorge Borges describes the Gnostic view of life that we are a careless or criminal blunder the fruit of engagement of the flawed deity and crude material Thus the Gnostic answers to these questions were radically different from those espoused by traditional religions of the time Gnosticism through the Prism of the Third Millennium explores this Gnostic view of life and how they viewed a material world as a distortion of celestial spheres and how in humanity they saw a being doomed to suffering yet carrying inside the spark of the supreme divine world Author Alexander Maistrovoy offers a history of Gnosticism and its confrontation with the church showing how despite the crash of Gnostic schools its teachings and its questions did not disappear Today we can make sense of Gnostic philosophy not through the prism of mysticism or mythology but from the point of view of rationalism scientific knowledge and historical experience And what we will discover is that Gnostic thought has meaning and relevancy today shedding light on fundamental questions about the universe ourselves and the divine **Perilous Planet Earth** Trevor Palmer, 2003-06-12 A readable account of the history of natural disasters throughout history *Thinking Beyond Darwin* Ernst Michael Kranich, 1999 Through the work of Charles Darwin a great task was set before science to progress from opinions about evolution to a science of evolution and reveal the inner laws and driving forces at work in the development of the organic world In *Thinking beyond Darwin* Ernst Michael Kranich focuses on a central problem of evolutionary science He shows us a way based on Goethe's botanical and zoological investigations of seeing the coherence and inner dynamics of organisms Using Goethe's concept of type as a key to vertebrate evolution Kranich methodically lays the foundation for a science of evolution He focuses on the central problem of evolutionary science are there underlying principles that connect the many disparate facts By applying Goethe's method consistently to evolutionary thinking Kranich shows that the laws and driving forces of evolution are encompassed by the inner lawfulness of living organisms and that we must participate through formative thinking in the evolutionary processes *Thinking beyond Darwin* makes an important contribution to the development of more adequate concepts of evolution and arrives at clear insights about earlier animal forms and evolutionary laws that could have immense consequences for future evolutionary thinking **Evolution** Duane T.
