New Financial Landscape Otaviano Canuto, 2012

The New Financial Landscape Otaviano Canuto, Catiana Garcia-Kilroy, Anderson Caputo Silva, 2014 As the year 2012 unfolds its main legacy will be its game changing impact on global financial markets Waning global growth along with central banks bold monetary easing policies in advanced economies AEs to try to reverse it are changing market dynamics in unexpected ways across both AEs and emerging market economies EMEs The combination of monetary stimulus fiscal austerity and hesitant structural economic policy reforms in AEs particularly in Europe is taking the global financial system into increasingly uncharted territory How the European Union will address the future of the euro zone including uncertainties over its banking sector as well as how the United States handles its Fiscal Cliff will weigh heavily on economic balances across all economies worldwide This seems to be a significant point of inflection on the speed of the rebalancing of economic relevance of AEs in favor of EMEs taking place over the last 12 years Under this scenario the ability of EMEs to handle their own fiscal financial and real economy weaknesses is critically tied to their ability to weather external shocks and take advantage of growing global savings while searching for yield and growth opportunities

Corporate Governance, Financial Markets and Global Convergence Morten Balling, Elizabeth Hennessy, Richard O'Brien, 2013-11-11 for many years been heavily dependent on bank financing and this situation has not changed fundamentally In his paper on stock exchange governance in the European Union Guido Ferrarini discusses the relative merits of member and investor ownership and compares stock exchange regulation in a number of EU countries Faced with increasing competition amongst themselves and against other enterprises that offer transaction services such as proprietary trading systems it is essential for European stock exchanges to improve their efficiency and to generate volume Large investments in new information technology are necessary in order to preserve competitiveness in a global financial market The implementation of the ISD has accelerated cross border transaction activity of member firms and investors and strengthened the pressure for convergence of national stock exchange laws in the EU In their paper Francesco Giavazzi and Marco Battaglini look at the role played by banks in privatization processes Banks can be involved in such processes in several ways They may themselves be the objects of privatization since in many countries a significant fraction of the banking industry is publicly owned This is the case in France Spain and Italy But banks can also be important buyers of the equity of industrial firms sold by the government if they are allowed to do so The authors characterize privatizations as a very good opportunity to set up the right environment for the development of new financial intermediaries and in general for a sound corporate governance system
