New Introduction To Classical Chinese:

A New Introduction to Classical Chinese Raymond Dawson, Raymond Stanley Dawson, 1984 *A New Introduction to Classical Chinese* introduces the reader to the Classical Chinese of the ancient world through the presentation of text passages with grammatical commentary Beginning with Mencius the work which purports to contain the teachings of the first great disciple of Confucius and passages from other writers of the fourth and third centuries BC the author progresses to selections from the great Han Dynasty historian Ssu ma Ch ien who became a model for future generations of Chinese writers This book has become a standard work for use in universities as well as for private study The introductory material employs the Wade Giles system of romanization which has been used for the great majority of academic works but the bulk of the book also offers the reader the alternative of employing the now standard Pinyin romanization This is a redesigned re issue of *A New Introduction to Classical Chinese* which in 1985 replaced the author's *An Introduction to Classical Chinese* first published in 1968 The notes were entirely revised and the amount of text nearly doubled The book goes beyond the fourth century to include material from the great Han Dynasty historian Ssu ma Ch ien who perfected a narrative style that became a model for future generations of Chinese writers

Outline of Classical Chinese Grammar Edwin G. Pulleyblank, 2010-10-01 Outline of Classical Chinese Grammar is a comprehensive introduction to the syntactical analysis of classical Chinese Focusing on the language of the high classical period which ranges from the time of Confucius to the unification of the empire by Qin in 221 the book pays particular attention to the Mencius the *L nyu* and to a lesser extent the *Zu zhu n* texts Outline of Classical Chinese Grammar starts with a brief historical overview and a discussion of the relation between the writing system and the phonology This is followed by an outline of overall principles of word order and sentence structure The next sections deal with the main sentence types nominal predicates verbal predicates and numerical expressions which constitute a special type of quasiverbal predication The final sections cover such topics as subordinate constituents of sentences nondeclarative sentence types and complex sentences

Registerial Expertise in Traditional Chinese Medical Translation Yan Yue, 2025-03-31 Yue's book explores the nature of translation using traditional Chinese medicine TCM and the TCM classic *Huangdi Neijing* and its various translations Yue examines in great detail and depth the important factors that cause the differences in the translators' treatment of language indeterminacies Apart from having multi faceted and fine grained linguistic analysis this book also serves as a good model of methodology in terms of corpus building contrastive analysis exemplification and glossing following systemic functional linguistics SFL convention This book is an argument for greater emphasis on the linguistic notion of register in translator's expertise specifically in the way that professional experience and

training with their registerial demands may be the key to semantic decisions forced on a translator by the inevitable vagaries and indeterminacies of establishing a working equivalence across languages and cultures and deep time It probes the issue in an extreme case the debate over who is the ideal translator in Chinese medicine translation through various case studies The result suggests it is possible to demonstrate empirically that clinical experience in translators is likely to have consistent or even measurable consequences This book will be of interest to three different fields translators in training applicable systemic functional linguistics and traditional Chinese medicine communication **Classical Chinese for Everyone** Bryan W. Van Norden, 2019-10-15 In just thirteen brief accessible chapters this engaging little book takes absolute beginners from the most basic questions about the language e g what does a classical Chinese character look like to reading and understanding selections from classical Chinese philosophical texts and Tang dynasty poetry An outstanding introduction to reading classical Chinese Van Norden does a wonderful job of clearly explaining the basics of classical Chinese and he carefully takes the reader through beautifully chosen examples from the textual tradition An invaluable work Michael Puett Harvard University Introduction to Classical Chinese Philosophy Bryan W. Van Norden, Bryan William Van Norden, 2011 This book is an introduction in the very best sense of the word It provides the beginner with an accurate sophisticated yet accessible account and offers new insights and challenging perspectives to those who have more specialized knowledge Focusing on the period in Chinese philosophy that is surely most easily approachable and perhaps is most important it ranges over a rich set of competing options It also with admirable self consciousness presents a number of daring attempts to relate those options to philosophical figures and movements from the West I recommend it very highly Lee H Yearley Walter Y Evans Wentz Professor Religious Studies Stanford University A substantial and highly accessible introduction to the indigenous philosophies of China Van Norden shares his clear distillations of classical Chinese philosophies using conceptual frameworks many will find familiar This reader friendly book sets the historical and cultural contexts for the philosophies discussed and includes appendices study questions and imaginative scenarios which aid us in appreciating some of the most important philosophy ever developed Ann Pirruccello Professor of Philosophy University of San Diego This lucid introduction to early Chinese thought offers historical textual and conceptual analyses of the schools of Classical Chinese philosophy illuminating their basic themes theories and arguments and providing readers with an intellectual bridge between Chinese and Western thought Introductory texts such as this are especially needed today as the study of philosophy faces the challenges of globalization and the urgent need for dialogue among different philosophical traditions An ideal text for introductory courses this book will also inspire graduate students scholars and experts in philosophy in general and Chinese Philosophy in particular with its theoretical insights and comparative methodology Vincent Shen Lee Chair in Chinese Thought and Culture Departments of Philosophy and East Asian Studies University of Toronto *An Introduction to Classical Chinese* Raymond Dawson, 1968 **The Qing Dynasty and Traditional Chinese Culture** Richard J.

Smith, 2015-10-23 The Qing dynasty 1636-1912 a crucial bridge between traditional and modern China was remarkable for its expansiveness and cultural sophistication This engaging and insightful history of Qing political social and cultural life traces the complex interaction between the Inner Asian traditions of the Manchus who conquered China in 1644 and indigenous Chinese cultural traditions Noted historian Richard J. Smith argues that the pragmatic Qing emperors presented a Chinese face to their subjects who lived south of the Great Wall and other ethnic faces particularly Manchu Mongolian Central Asian and Tibetan to subjects in other parts of their vast multicultural empire They were attracted by many aspects of Chinese culture but far from being completely sinicized as many scholars argue they were also proud of their own cultural traditions and interested in other cultures as well Setting Qing dynasty culture in historical and global perspective Smith shows how the Chinese of the era viewed the world how their outlook was expressed in their institutions material culture and customs and how China's preoccupation with order unity and harmony contributed to the civilization's remarkable cohesiveness and continuity Nuanced and wide ranging his authoritative book provides an essential introduction to late imperial Chinese culture and society

New Aspects of Classical Chinese Grammar Barbara Meisterernst, 2016 The objective of the collection of articles presented in this volume is to provide a representative and meaningful selection of present research work on Classical Chinese Grammar Since the articles cover a temporal range from the Pre Classical to the Medieval period the term Classical Chinese is used in a more generous sense Two different but representative lines of research are predominant in this collection the first focuses on the lexicon of Chinese and the second focuses on its syntax or on the interface of its syntax and its semantics Regarding the history of grammatical studies of Chinese the first approach can be considered as a continuation and refinement of the traditional Chinese linguistic studies with new linguistic tools the second approach follows and enhances the syntactic approach first proposed for the analysis of Chinese in the grammar of von der Gabelentz In addition to these two general fields a third and innovative field of research is included focusing on the stratification of different linguistic registers in the Ancient Chinese language With its selection of articles this volume represents the multifaceted approaches presently employed to study the lexicon and the grammar of Classical Chinese and it demonstrates the great progress the employment of different theoretical frameworks has induced in the analysis of the grammar Classical Chinese in recent times This volume intends to convey the relevance of a meticulous and detailed study of the structural properties of Classical Chinese and to demonstrate that this study has to go beyond the mere analysis of apparent similarities
